

Sliding – Folding – Stacking

# Furniture hardware

## About Hawa AG

Our metier since 1965 has been pivoting, sliding and folding hardware systems – along with the fascinating applications they have opened for our customers. Thus, we have grown into a name of international repute within our specialist areas of glass/metal/wood architectural hardware, and hardware for furniture.

We – and hence our customers – are totally committed to Swiss quality. Despite the fact that we now export over 80% of our output, production is located at home in Mettmenstetten. This is not least because our business philosophy is still based on characteristically Swiss values like precision, reliability, and durability.

## About this catalogue

Optimising space, creating rooms, solving problems, saving time – our hardware carries an impact that reaches far beyond its essential sliding, stacking and folding functionality. This catalogue provides you with detailed ordering information and technical data for our entire range of glass/metal folding and sliding hardware systems. And should you have a specific requirement in the pipeline, please contact us – we are happy to be of help.

## Find out about the rest of the Hawa range:

### Architectural hardware glass/metal

- Glass sliding doors with patch suspension
- Glass sliding doors with suspension/retainer profiles

**Hardware system for bottom running sliding cabinet doors with a weight up to 15 kg (33 lbs.) or 25 kg (55 lbs.).**

## Description

This hardware system permits extremely simple furniture construction. The top tracks and bottom guides are glued, which means that cabinet bottoms and tops with a thickness of only 19 mm ( $\frac{3}{4}$  inch) can be used.

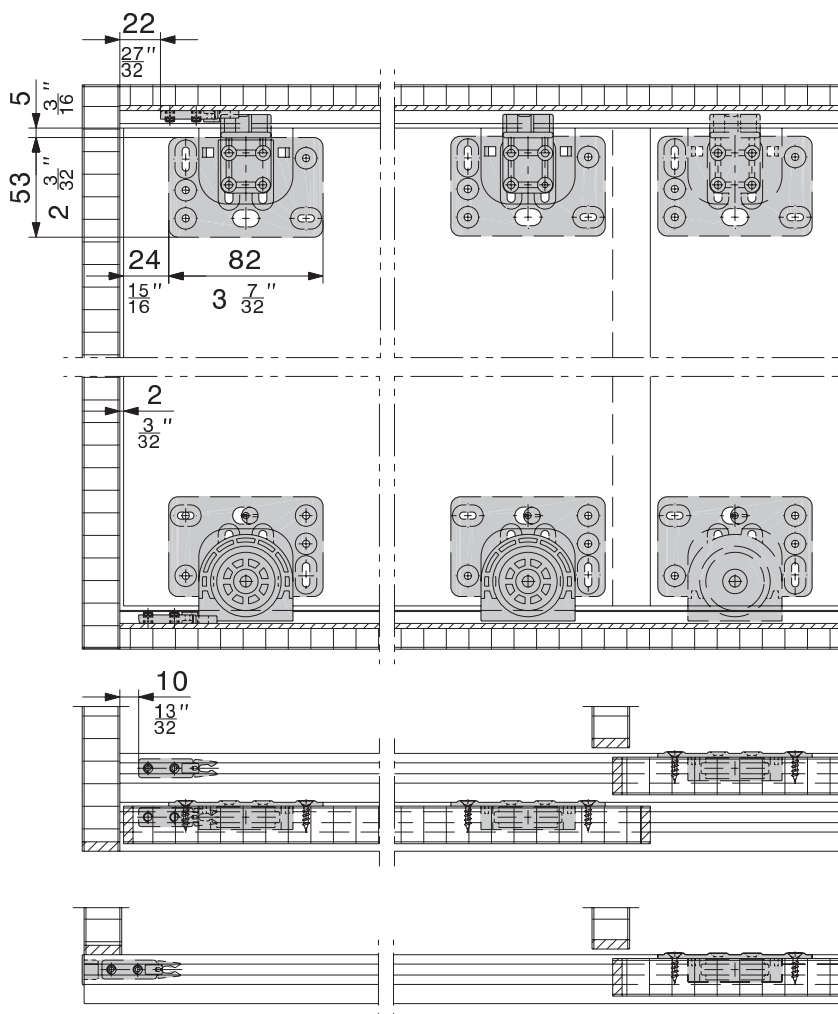

The sliding doors are vertically adjustable and are quick and easy to install. This is the ideal hardware system for interior designers and the furniture industry.

## Features of the HAWA-Miniroll 15

- Single-wheeled trolley with sliding bearings
- Maximum sliding door weight, 15 kg (33 lbs.)

## Features of the HAWA-Miniroll 25

- Single-wheeled trolley with ball bearings
- Maximum sliding door weight, 25 kg (55 lbs.)
- Minimum door thickness, 19 mm ( $\frac{3}{4}$  inch)
- Vertically adjustable height  $\pm 2$  mm ( $\frac{3}{32}$  inch)
- Track stop with retainer

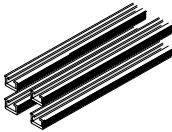

## Sets without reversible top tracks / guide profiles

## Hardware system for inlaying sliding cabinet doors up to 40 kg (88 lbs.).

### Description

The HAWA-Dorado 40/IS is a high-quality hardware system equipped with a patented suspension system. It permits very quick and easy installation. A 35 mm ( $1\frac{3}{8}$ ") press-fit cup permits the sliding doors to be installed and removed from below with a fixed facing, or from the front if the facing is removed. Progressive vertical and lateral adjustment can be carried out without removing the sliding doors as long as the hardware system is freely accessible on the inside of the cabinet. The sliding doors are held by a bottom guide channel fixed at one point.

If the doors are to be subjected to a great deal of use, we recommend using the HAWA-Dorado 40/MS. With this hardware system the sliding doors are held by a bottom guide channel fixed at two points.

### Applications

This hardware system is ideal wherever well-constructed high-quality cabinets with smooth-running sliding doors are required, e.g. interior design, offices, etc.

### Features of the HAWA-Dorado 40/IS

- Maximum sliding door weight 40 kg (88 lbs.)
- Door thicknesses 19, 22 and 25 mm ( $\frac{3}{4}$ ",  $\frac{55}{64}$ " and  $\frac{63}{64}$ ")
- Concealed press-fit cup, 35 mm ( $1\frac{3}{8}$ ")
- Simple vertical adjustment  $\pm 3$  mm ( $\frac{1}{8}$ ")
- Track stop with adjustable retainer

Subject to modification. Metric specifications are exact. Inches are approximate.

### Sets without top tracks and guide profiles

	3000 (9'10 $\frac{1}{8}$ "	18530	
	4000 (13'1 $\frac{1}{2}$ "	18531	
	6000 (19'8 $\frac{7}{32}$ "	10211	
	cut to size	10217	

## Guide profiles

		mm/inch	code
	Guide profile, plastic brown	3000 (9'10 <sup>1</sup> / <sub>8</sub> ")	10319
		6000 (19'8 <sup>7</sup> / <sub>32</sub> ")	10313
		cut to size	10321

### Important: panel sizing

2-panel installation:

The width of the forward doors is exactly equal to one half of the inside cabinet width. The rear panel is made 27 mm (1 $\frac{1}{16}$ " ) wider which greatly simplifies attachment of the floor guide 10560.

3-panel installation:

If the centre panel is to be in front, its width will be equal to one third of the inside cabinet width. The two rear panels are each made 27 mm ( $1\frac{1}{16}$ ") wider. If the centre panel is to be rear, its width will equal one third of the inside cabinet width, plus 2 x 27 mm ( $2 \times 1\frac{1}{16}$ "). The width of the two forward panels equals one third of the inside cabinet width.

### Order specifications

- Number and type of hardware sets
- Number and type of track sets, or
- Type and length of top track
- Type and length of bottom guide channel
- Number of additional stop bumpers

## Hardware system for semi-overlaying sliding cabinet doors up to 40 kg (88 lbs.).

### Description

The HAWA-Dorado 40/MS is a high-quality hardware system equipped with a patented suspension system. It permits very quick and easy installation. A 35 mm ( $1\frac{3}{8}$ ") concealed press-fit cup permits the sliding doors to be installed and removed from below with a fixed facing, or from the front if the facing is removed. Progressive vertical and lateral adjustment can be carried out without removing the sliding doors as long as the hardware system is freely accessible on the inside of the cabinet. This system is especially suitable for wide doors, which are held by bottom guide channels fixed at two points.

Centre bottom overlaying sliding doors can be moved to both sides thanks to the additional stop bumper 13315 installed on the base.

### Applications

This hardware system is ideal wherever well-constructed high quality cabinets with smooth-running sliding doors are required, e.g. in hotels, offices, the industrial and administration sectors, apartments, etc.

### Features of the HAWA-Dorado 40/MS

- Maximum sliding door weight 40 kg (88 lbs.)
- Door thicknesses 19, 22 and 25 mm ( $\frac{3}{4}$ ",  $\frac{55}{64}$ " and  $\frac{63}{64}$ ")
- Concealed press-fit cup, 35 mm ( $1\frac{3}{8}$ ")
- Simple vertical adjustment  $\pm 3$  mm ( $\frac{1}{8}$ ")
- Track stop with adjustable retainer
- Track stop at bottom as bumper

### Installation

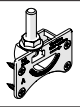

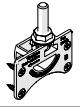

The top and bottom track stops have to be adjusted in a way that the tracks and guides stop simultaneously.

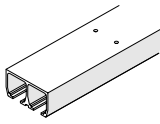

## Sets without top track and bottom guide channels

**Extensive and versatile with wood and glass.**

**Hardware system for wooden and glass sliding doors running in front of the cabinet body and weighing up to 50 or 80 kg (110 or 176 lbs.).**

## Description

HAWA-Antea 50-80/FS is a sliding hardware system for discerning demands on quality in cabinet construction. HAWA-Antea 50-80/FS is characterised as much by aesthetic appeal, freedom of scope and an orientation toward design as it is by unique running smoothness, ease of installation and a love of detail. The four design options available for the glass solution are combinable with wooden sliding doors, whilst the top tracks and bottom guide profiles as well as all fastening components disappear behind the cover profile. The sliding doors run effortlessly and with next to no noise in front of the cabinet as a full overlay version; up to 50 kg (110 lbs) door weight on high quality sleeve bearings whilst doors weighing up to 80kg (176lbs) provide the same performance on plastic coated ball bearings. The soft closing system gently brakes and closes the doors in both sliding directions. A centre bumper is used on systems with three or more doors. It positions the centre outer door precisely and still allows doors to slide in both directions. The system is setting new standards through top tracks and bottom guide profiles available for retrospective fitting from the front and door installation without using tools.

## Applications

Wherever high demands are made on quality, smoothness and flexible front design, for instance in offices, hotels, schools and hospitals as well as in upmarket, design-oriented interior finishings.

## Features of HAWA-Antea 50-80/FS

- Maximum door weight 50 kg and 80 kg (110/176 lbs.)
- Door width 800–1500 mm (2'7 $\frac{1}{2}$ " – 4'11 $\frac{1}{16}$ " )
- Maximum door height 2600 mm (8'6 $\frac{3}{8}$ " )
- Door thickness, wood, 19–28 mm ( $\frac{3}{4}$ " – 1 $\frac{1}{8}$ " )
- Door thickness ESG (fully tempered monolithic glass): 8 mm ( $\frac{5}{16}$ " )
- 4 design options with a modular all-glass system
- Combinable wooden and glass sliding doors (glass doors always run closer to the cabinet body)
- Tool-free installation of wooden sliding doors
- Flush, point-fixing and interlocking glass suspension
- Retrospective installation of top tracks and bottom guide profiles possible from the front (niche or recess installations)
- Alignment hardware for wood and all-glass doors
- No visible fastening screws, neither inside or outside of the cabinet
- Optional soft-closing system fits discreetly on top of the cabinet body

Option: 2-doors, wood

Option: 3-doors, glass, type 1

Subject to modification. Metric specifications are exact. Inches are approximate.

## Design options

HAWA-Antea 50-80/FS not only enables cabinet front designs with wooden sliding doors but also with glass sliding doors. With a total of four different options. The material mix is the system's big plus, as HAWA-Antea 50-80/FS can combine wooden and glass sliding doors.

## Design option wood/glass

The glass door must always run closer to the cabinet body with wood/glass combinations:

	Adapter for dual top track and dual bottom guide channel, alu plain anodized, set of 2 pieces		-	1	3	2	-	22493

## Covering screen, dual top track and dual guide channel, cut to size

		mm/inch	code
	Dual top track, alu plain anodized	cut to size	22186
	Dual guide channel, alu plain anodized	cut to size	22181
	Covering screen, alu plain anodized	cut to size	22173

## Track assembly

The adapters for top tracks and bottom guide profiles are fitted to the base and top sections during pre-assembly. This allows to simply clamp the top tracks and bottom guide profiles to the finished cabinet body from the front. The clip-on cover plates conceal top tracks and bottom guide profiles as well as the fastening screws.

Top track assembly

Bottom guide profile assembly

## Height adjustment

Height adjustments to the trolley are conveniently made from the side. Access via the door is not necessary.

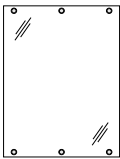

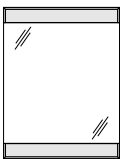

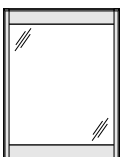

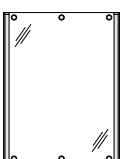

## Drilling jig

The drilling jig provided covers all the necessary processing steps during assembly:

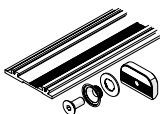

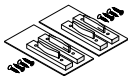

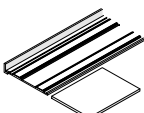

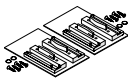

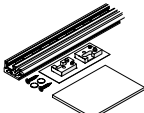

- Top tracks and bottom guide profiles
- Soft closing system
- Track adapter
- Suspension

	Decor discs for glass patch fixings, alu plainanodized, set of 4 pieces	22669

## Glass solutions

The new modular all-glass system offers extensive freedom of design with interlocking and therefore totally safe glass fastening. The decor discs, cover profile and vertical frame profile allow for four different types of design.

### Type 1

### Type 2

### Type 3

### Type 4

Subject to modification. Metric specifications are exact. Inches are approximate.

## Calculating/ordering glass

For detailed glass calculation and ordering please use assembly instruction number 22853.

- Only 8 mm ( $\frac{5}{16}$ " ) glass ESG (fully tempered monolithic glass) may be used
- All glass edges and drill holes have to be seamed

## Required glass drill holes

Glass sliding doors have a interlocking connection with the glass suspension system. 4 or 6 drill holes are required depending on the door width.

Door width  
≤ 1000 mm (3'3  $\frac{1}{8}$ " )

Door width  
1001–1500 mm  
(3'3  $\frac{13}{32}$ " –4'11  $\frac{1}{16}$ " )

## Accessories

		mm/inch	code
	Rubber profile self-adhesive, for 8/10 mm ( $\frac{5}{16}$ " ) glass thickness, translucent, glass distance 4 mm ( $\frac{5}{32}$ " )	2600 (8'6 $\frac{3}{8}$ " )	22583

## Rubber profile for protecting glass edges

The self-adhesive rubber profile on the front edge of the glass panel protects the edges when glass sliding doors of type 1 bump together.

## Door handle for wooden and glass door

		mm/inch	code
	Door handle, alu plain anodized, for glass door thicknesses 8 mm ( $\frac{5}{16}$ " ) and wooden door thickness 20 mm ( $\frac{3}{4}$ " )	400 (1'3 $\frac{3}{4}$ " )	22692
	Door handle profile for frame profile, alu plain anodized	400 (1'3 $\frac{3}{4}$ " )	22615
		1260 (4'1 $\frac{5}{8}$ " )	22616
		2600 (8'6 $\frac{3}{8}$ " )	22617

## Door handle for wooden and glass door

The door handle 22692 is available for glass solution types 1 and 2 and for wooden doors. Door handle types 22615/22616/22617 are screwed to the vertical frame profile on glass solutions of type 3 and 4.

code 22692

code 22692

code 22615 – 22617

## Door handle positions on wooden and glass doors of type 1 and 2

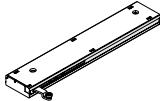

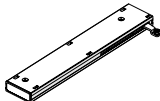

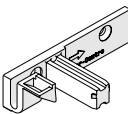

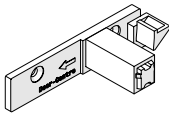

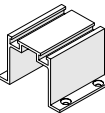

When fitted to the trolley for the inner door the top bumper stop with rubber ring (22550) prevents the door handle from striking against the adjacent door and effectively protects fingers. Two assembly positions (M) for the stop bumper allow for adjustments to the amount of space required for the door handle.

## Soft closing system

	code
Soft closing system, 1 pair for 2-door cabinet	22566

## Set comprising

		piece	code
	Soft closing system for left-hand furniture doors, plastic grey	1	20815
	Soft closing system for right-hand furniture doors, plastic grey	1	20816
	Driver for soft closing system for right-hand furniture doors	1	22223
	Driver for soft closing system for left-hand furniture doors	1	22226
	Adapter for soft closing system for furniture doors	4	22163
	Fitting set to soft closing system	1	22591

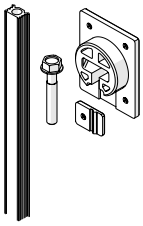

## Soft closing system

The soft closing system gently stops wooden and/or glass sliding doors and pulls them quietly into the closed position. Soft closing systems are discreetly fitted to the left and right on top of the cabinet body. It is highly recommendable for comfortably operating doors weighing up to 80 kg (176 lbs.).

## Aligner – Set for 1 wooden door

	code
 <p>Aligner for stabilisation of wooden sliding door, 2 pieces for 1 door</p>	18705
<ul style="list-style-type: none"> <li>for door thicknesses of 16–28 mm (<math>\frac{5}{8}</math>"–<math>1\frac{1}{8}</math>" )</li> <li>for door heights up to 2600 mm (<math>8'6\frac{3}{8}</math>" ) (not suitable for solid hardwood)</li> </ul>	

## Aligner for wooden and glass sliding doors

There is a good chance for deflection for doors that are suspended aside their axis points and in front of a cabinet body, be it for wood or for glass doors. Especially since for glass doors it is unpredictable how the glass will perform we recommend using the aligner hardware in any case.

Clamping profiles in wood doors are inserted vertically into the door panel. Glass doors offer the option of fitting the steel cables diagonally or vertically according to creative design taste.

Wood door

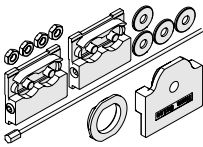

Glass door

Glass door

## Aligner – Set for 1 glass door

	code
 <p>Aligner for glass sliding doors 2 pieces for 1 door</p>	22670
<ul style="list-style-type: none"> <li>for glass thickness ESG<sup>1</sup> 8 mm (<math>\frac{5}{16}</math>" )</li> <li>for door heights up to 2600 mm (<math>8'6\frac{3}{8}</math>" )</li> </ul>	

## Order specifications

- Type and quantity of sets
- Length and quantity of top track sets

## Order specifications for glass solutions

- Quantity and length of retainer profiles

## Optional order specifications for glass solutions

- Quantity of retention profile cover caps
- Quantity and length of covering screens
- Quantity of cover caps for covering screens
- Quantity and length of frame profiles
- Quantity of decor discs for glass patch suspension units

## Optional order specifications

- Quantity of soft closing systems
- Type and quantity of alignment hardware sets
- Quantity of door handles for wooden and/or glass doors
- Quantity and length of door handle profiles for frame profile
- Quantity of rubber profiles for glass edge protection

## Planning/installation

For planning and installation purposes, please use the installation drawings:

**For frameless, full room-height sliding doors.**

**Hardware system with patch-fitting floor guides for wooden and/or glass sliding doors weighing up to 70 kg (154 lbs.).**

## Description

A fit-anywhere, frameless sliding hardware system for wooden and glass sliding doors weighing up to 70 kg (154 lbs.). Ideal not only for walk-in closets, but also for room-height and flexible partitions in residential and office settings. The possibility of combining glass and wood sliding doors gives new freedom to architects and installers. Patch-fitting, rattle-proof floor guides are available for all wood and/or glass combinations. HAWA-Ordena 70/P has also been designed with problem-free retrofitting in mind.

## Applications

Everywhere that variable space utilisation and unrestricted access should leave a tidy impression, e.g. walk-in closets for office and residential settings, and as a partition or aesthetic room divider in hotels, restaurants, hospitals, schools, offices, and private residential interiors.

## Features of the HAWA-Ordena 70/P

- Top-running sliding system, impervious to dust and dirt
- Possibility to combine wood and glass sliding doors
- Patch-fitting, rattle proof floor guide
- Frameless and easy to install
- Maximum door weight 70 kg (154 lbs.)
- Maximum door height 2600 mm (8'6 <sup>3</sup>/<sub>8</sub>" )
- Minimum door width 600 mm (1'11 <sup>5</sup>/<sub>8</sub>" )
- Door thickness, wood 30–40 mm (1 <sup>3</sup>/<sub>16</sub>" – 1 <sup>13</sup>/<sub>32</sub>" )
- Door thickness, glass:  
ESG (fully tempered monolithic glass): 8/10 mm ( <sup>5</sup>/<sub>16</sub>" / <sup>13</sup>/<sub>32</sub>" )  
VSG (fully tempered laminated glass): 8,7–10,7 mm ( <sup>11</sup>/<sub>32</sub>" – <sup>7</sup>/<sub>16</sub>" )
- 2–8 mm ( <sup>3</sup>/<sub>32</sub>" – <sup>5</sup>/<sub>16</sub>" ) minimum clearance between the top track and the top edge of the sliding door
- Glass doors use popular HAWA-Junior GP suspensions

Subject to modification. Metric specifications are exact. Inches are approximate.

## Full room-height with frameless guides.

**Hardware system with continuous bottom guide profile for wooden and/or glass sliding doors weighing up to 70 kg (154 lbs.).**

### Description

A fit-anywhere, frameless sliding hardware system for wooden and/or glass sliding doors weighing up to 70 kg (154lbs.). Ideal not only for walk-in closets, but also for room-height and flexible partitions in residential and office settings. The possibility of combining glass and wood sliding doors gives new freedom to architects and installers. The combination of a surface mounted continuous bottom guide profile and spring loaded floor guides easily accommodates differences in floor-to-ceiling height and permits any combination of wood and/or glass. HAWA-Ordena 70/F has also been designed with problem-free retrofitting in mind.

### Applications

Everywhere that variable space utilisation and unrestricted access should leave a tidy impression, e.g. walk-in closets for office and residential settings, and as a partition or aesthetic room divider in hotels, restaurants, hospitals, schools, offices and private residential interiors.

### Features of the HAWA-Ordena 70/F

- Top-running sliding system, impervious to dust and dirt
- Possibility to combine wood and glass sliding doors
- Wide doors are kept firmly on track by two spring loaded floor guides
- Clip or stick-on 4,5 mm ( $\frac{13}{32}$ ") high floor guide track
- Frameless and easy to install
- Doors can slide across the entire opening width
- Centre stop to hold sliding doors in position
- Maximum door weight 70 kg (154 lbs.)
- Maximum door height 2600 mm ( $8'6\frac{3}{8}"$ )
- Minimum door width 600 mm ( $1'11\frac{5}{8}"$ )
- Door thickness, wood 30–40 mm ( $1\frac{3}{16}"$ – $1\frac{19}{32}"$ )
- Door thickness, glass:
  - ESG (fully tempered monolithic glass): 8/10 mm ( $\frac{5}{16}"$ / $\frac{13}{32}"$ )
  - VSG (fully tempered laminated glass): 8,7–10,7 mm ( $\frac{11}{32}"$ – $\frac{7}{16}"$ )
- 2–8 mm ( $\frac{3}{32}"$ – $\frac{5}{16}"$ ) minimum clearance between the top track and the top edge of the sliding doors
- Glass doors use popular HAWA-Junior GP suspension

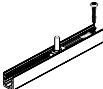

Subject to modification. Metric specifications are exact. Inches are approximate.

		cut to size	19373

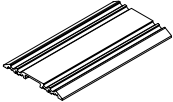

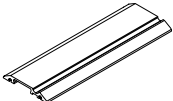

### Glass cutouts for sliding door

Both glass ESG (fully tempered monolithic glass) and VSG (fully tempered laminated glass) can be used.

- Glass thickness sliding door ESG (fully tempered monolithic glass):  
8/10 mm ( $\frac{5}{16}$ " ( $\frac{13}{32}$ ")), thickness tolerance  $\pm 0,3$  mm
- Glass thickness sliding door VSG (fully tempered laminated glass):  
2x4  $\pm 0,2$  mm  $\rightarrow$  film thickness 0,38/0,76/1,52 mm  
2x5  $\pm 0,2$  mm  $\rightarrow$  film thickness 0,38/0,76 mm
- All glass edges are seamed; maximum 1 mm ( $\frac{1}{16}$ " ) in the glass cutout
- VSG (fully tempered laminated glass) permissible with max. offset of 2 mm ( $\frac{3}{32}$ " ) in the glass cutout

- Type and quantity of door stop sets
- Type and quantity of floor guides
- Type and length of top track
- Type and length of bottom guide profile
- For glass doors
  - Type and quantity of cover plates
  - Length of rubber profile for glass edge protection
  - Quantity of centering assembly for wall connection profile

## Planning/installation

Please use the installation drawing code 19434 for planning and execution. (→ [www.hawa.ch](http://www.hawa.ch) → HAWA-Productfinder)

### Suspension points

The diagonally arranged threaded drill holes in the roller elements permit the use of this hardware system for sliding doors with a thickness of 19, 22, 25 and 30 mm ( $\frac{3}{4}$ ",  $\frac{55}{64}$ ",  $\frac{63}{64}$ " and  $1\frac{1}{16}$ ").

## Hardware system for inlaying sliding cabinet doors up to 40 kg (88 lbs.) or 70 kg (154 lbs.)

### Description

The HAWA-208 40-70/IS is characterised by its combination of high strength and low installation height. The sliding doors are guided at one point at the bottom. The track stop with retainer can be adjusted to the corresponding door weight.

If heavy doors are required that are to be subjected to a great deal of use, we recommend using the HAWA-209 70/MS hardware system. With this system the sliding doors are guided at two points in a bottom guide channel.

## Applications

This hardware system is ideal for use wherever heavy sliding doors are required to be moved with HAWA quality, e.g. in apartments, offices, hospitals, public buildings, the administration sector, etc.

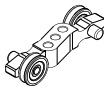

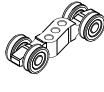

### Features of the HAWA-208 40-70/IS

- Two-wheeled trolley:  
for sliding doors with a weight up to 40 kg (88 lbs.)
- Four-wheeled trolley:  
for sliding doors with a weight up to 70 kg (154 lbs.)
- Door thicknesses 19, 22, 25 and 30 mm ( $\frac{3}{4}$ ",  $\frac{55}{64}$ ",  $\frac{63}{64}$ " and  $1\frac{3}{16}$ " )
- Simple vertical adjustment
- Track stop plastic, with adjustable retainer

## Hardware system for semi-overlapping sliding cabinet doors up to 40 kg (88 lbs.) or 70 kg (154 lbs.).

### Description

The HAWA-209 40-70/MS is characterised by a combination of high strength and low installation height. The sliding cabinet doors are guided at two points in the bottom guide channel. This hardware system is therefore ideally suited for use with wide doors.

Centre bottom overlaying sliding doors can be moved to both sides thanks to an additional stop bumper installed on the base.

### Applications

This hardware system is ideal for use wherever heavy sliding doors are required to be moved with HAWA quality, e.g. in apartments, offices, hospitals, hotels, public buildings, the administration sector, etc.

### Features of the HAWA-209 40-70/MS

- Two-wheeled trolley:  
for sliding doors with a weight up to 40 kg (88 lbs.)
- Four-wheeled trolley:  
for sliding doors with a weight up to 70 kg (154 lbs.)
- Door thicknesses 19, 22, 25 and 30 mm ( $\frac{3}{4}$ ",  $\frac{55}{64}$ ",  $\frac{63}{64}$ " and  $1\frac{3}{16}$ ")
- Simple vertical adjustment
- Track stop plastic, with adjustable retainer

### Suspension points

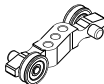

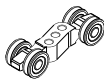

The diagonally arranged threaded drill holes in the roller elements permit the use of this hardware system for sliding doors with a thickness of 19, 22, 25 and 30 mm ( $\frac{3}{4}$ ",  $\frac{55}{64}$ ",  $\frac{63}{64}$ " and  $1\frac{3}{16}$ ").

**Hardware system for flush-mounted sliding cabinet/wardrobe doors with a panel weight up to 70 kg (154 lbs.), both doors flush when closed.**

## Description

The HAWA-220 Planfront 70 offers countless interior design possibilities. Sliding elements may be flush-mounted to a wainscot or cupboard. Projection screens or media walls may be hidden away without the slightest difficulty. The sliding doors can be moved parallel behind a fixed front. The doors can be locked using a standard bar bolt lock. The sliding elements run in the top track and are guided in a bottom guide channel.

## Applications

This hardware system is suitable for use wherever it is required to flush-mount cabinet fronts or wainscots for aesthetic or practical reasons, e.g. in apartments and houses, schoolhouses, conference rooms, etc., and in the industrial and administration sectors.

## Features of the HAWA-220 Planfront 70

- Maximum sliding door weight, 70 kg (154 lbs.)
- Door widths 400–1500 mm (1'3 $\frac{3}{4}$ "–4'11 $\frac{1}{16}$ ")
- Door thicknesses 19–45 mm ( $\frac{3}{4}$ "–1 $\frac{25}{32}$ ")

		cut to size	10188

## Order specifications

- Width of sliding panels
- Number of sliding panels
- To be moved to the left or right, viewed from the exterior
- Number and type of sets

## Planning/installation

Please use for planning and execution the installation drawing code 17915. (→ [www.hawa.ch](http://www.hawa.ch) → HAWA-Productfinder)

## 4-panel constructions

4-panel installations are possible in combination with straight-running sliding door hardware. (Version B)

## Dimensional-tolerance

A result of the production process is that the radii of the top tracks and bottom guide channels feature dimensional tolerances. In the event that the top tracks and bottom guide channels are groove-mounted the cutouts must be made in conformity with the track radii.

## Hardware system for cabinet sliding doors up to 40 kg (88 lbs.). Stacking parallel to the sliding axis.

### Description

Convenient sliding door hardware system for multi-door cabinet fronts weighing up to 40 kg (88 lbs.), that can be stacked out of sight in a niche or cabinet compartment.

When closed, the cabinet front is flush, with uniform gaps between panels if desired, even in combination with hinged doors on upper and lower cabinets.

With this sophisticated system, the same hardware kit may be used for left and right-hand stacking areas. The number and width of door panels is also flexible.

Unrestricted access to the entire cabinet width while the front is open.

### Applications

All types of furniture with frequently-opened doors, like media walls, office cabinets, shop installations, counter-top to ceiling shutters, kitchenettes, and everywhere that requires space-saving door opening.

### Features of the HAWA-Aperto 40/F

- Maximum panel weight 40 kg (88 lbs.)
- Panel thickness 19–25 mm ( $\frac{3}{4}$ "– $\frac{63}{64}$ " )
- Maximum panel height 2600 mm ( $8'6\frac{3}{8}"$ )
- Panel width 400–900 mm ( $1'3\frac{3}{4}"$ – $2'11\frac{7}{16}"$ )
- Continuous height adjustment  $\pm 2$  mm ( $\frac{3}{32}$ " )
- Minimum axis radius 2000 mm ( $6'6\frac{3}{4}"$ ) for curved applications
- Centre stop with adjustable friction
- Flush-mounted panels
- Stacking area accommodates up to 7 door panels

## Stacking area options

HAWA-Aperto 40/F allows cabinet fronts to be stacked out of sight behind a hinged door, or used as visible design elements while parked.

## Plan examples

The system accommodates up to 7 panels per stacking area.  
Individual panel width per installation.

Installations with two stacking areas are considered as two systems.

## Convenient operation

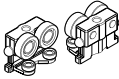

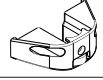

Plastic cover caps with buffer rollers provide extensive protection to cabinet fronts as they slide into the stacking area.  
To avoid damage, we nonetheless recommend individually sliding each panel into the stacking area.

## Aligner – Set for 1 door

		code
	Aligner for stabilisation of wooden sliding doors, set for 1 door	18705
<ul style="list-style-type: none"> <li>• for door thicknesses of 16–28 mm (<math>\frac{5}{8}</math>"–1<math>\frac{1}{8}</math>" )</li> <li>• for door heights up to 2600 mm (8'6<math>\frac{3}{8}</math>" ) (not suitable for solid hardwood)</li> </ul>		

## Sliding comfort

Easy sliding action thanks to forced guiding system, plastic rollers and anodised aluminium top tracks for extremely light and quiet running.

## Stabilising of sliding panel

The aligner set facilitates straightforward stabilisation and alignment of the sliding panels. We recommend using two profile strips per panel, which can be shortened if necessary.

Detail's for aligner: → page 70

## Order specifications

- Quantity of panel sets
- Quantity of stacking area sets
- Quantity and length of track set

## Custom installations

Please contact Hawa for special installations with more than 7 panels, curved top tracks, or an integral change of track direction.

## Planning/installation

For planning and installation purposes, please use the installation drawing code 17808. (→ [www.hawa.ch](http://www.hawa.ch) → HAWA-Productfinder)

**Easy to implement – convenient to use.**

**Hardware system for pivot sliding cabinet doors weighing up to 25, 30, 40 and 50 kg (55/66/88/110 lbs.)**

## Description

The HAWA-Concepta 25/30/40/50 slides doors alongside cabinet bodies or into wall recesses. Room-high designs and walk-in cabinets are easy and efficient to implement. The well-thought-out concept has omitted a bottom guide channel and offers optimum flexible room utilisation with no obstructions in the form of protruding doors. HAWA-Concepta 25/30/40/50 is a true master of design thanks to a broad band width of available dimensions, weights and material thicknesses, and the combinations which are possible with HAWA-Folding Concepta 25.

## Application

Its advantages are obvious wherever variable room utilisation and unobstructed access should leave a tidy impression, for instance the home office in the bedroom, or to hide appliances in the kitchen or the washing machine in the bathroom. Even walk-in cabinets are realizable.

## Features of HAWA-Concepta 25

- Maximum door weight 25 kg (55 lbs.)  
→ door weight/height ratio
- Door width 300–750 mm ( $11\frac{13}{16}$ "– $2'5\frac{17}{32}$ ")
- Door height 1250–1850 mm ( $4'1\frac{7}{16}$ "– $6'0\frac{27}{32}$ ")
- Door thickness 19–50 mm ( $\frac{3}{4}$ "– $1\frac{31}{32}$ ")

## Features of HAWA-Concepta 30

- Maximum door weight 30 kg (66 lbs.)  
→ door weight/height ratio
- Door width 300–900 mm ( $11\frac{13}{16}$ "– $2'11\frac{7}{16}$ ")
- Door height 1851–2300 mm ( $6'0\frac{7}{8}$ "– $7'6\frac{9}{16}$ ")
- Door thickness 19–50 mm ( $\frac{3}{4}$ "– $1\frac{31}{32}$ ")

## Features of HAWA-Concepta 40

- Maximum door weight 40 kg (88 lbs.)  
→ door weight/height ratio
- Door width 300–900 mm ( $11\frac{13}{16}$ "– $2'11\frac{7}{16}$ ")
- Door height 1851–2500 mm ( $6'0\frac{7}{8}$ "– $8'2\frac{7}{16}$ ")
- Door thickness 19–50 mm ( $\frac{3}{4}$ "– $1\frac{31}{32}$ ")

## Features of HAWA-Concepta 50

- Maximum door weight 50 kg (110 lbs.)  
→ door weight/height ratio
- Door width 300–900 mm ( $11\frac{13}{16}$ "– $2'11\frac{7}{16}$ ")
- Door height 2301–2850 mm ( $7'6\frac{19}{32}$ "– $9'4\frac{7}{32}$ ")
- Door thickness 19–50 mm ( $\frac{3}{4}$ "– $1\frac{31}{32}$ ")

## Features of HAWA-Concepta 25/30/40/50

- HAWA-Concepta 25/30 with guide rollers, top and bottom
- HAWA-Concepta 40/50 with two-wheeled trolley, top
- Door is automatically pulled into pocket
- Well thought-out shock absorber in the end positions provides a high degree of movement comfort
- Unique scissor technology accommodates large and heavy doors
- All adjustments are made from the front
- All components are screwed onto the intermediate panel
- Wall recesses can be concealed without a cabinet body
- The same set can be used for left and right hand side applications
- The connector profile makes it easier to assemble cabinet designs with doors striking against the top and bottom cabinet sections
- Certified LGA

## Design option: Door striking against the top and bottom cabinet section

The implementation of cabinets using HAWA-Concepta 25/30/40/50 makes cabinet construction simple. In conjunction with the optionally available connector profile, the HAWA-Concepta 25/30/40/50 pivot/slide-in door hardware forms a modular overall system with extremely simple installation.

This makes it possible for single pivot/slide-in doors to be slid into a 55 mm niche or pairs of pivot/slide-in doors to be slid into a 110 mm niche. The Connector 55 and Connector 110 mm profiles can be used to connect the HAWA-Concepta 25/30 with guide rollers for lightweight doors and also connect the HAWA-Concepta 40/50 with a running gear for large and heavy doors.

System: HAWA-Concepta 25/30  
Connection: Connector 55 mm ( $2\frac{3}{32}$ " )

System: HAWA-Concepta 25/30  
Connection: Connector 110 mm ( $4\frac{11}{32}$ " )

System: HAWA-Concepta 40/50  
Connection: Connector 55 mm ( $2\frac{3}{32}$ " )

System: HAWA-Concepta 40/50  
Connection: Connector 110 mm ( $4\frac{11}{32}$ " )

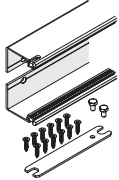

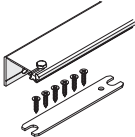

Connector 55 mm ( $2\frac{3}{32}$ " )  
Maximum door thickness: 30 mm ( $1\frac{3}{16}$ " )

Connector 110 mm ( $4\frac{11}{32}$ " )  
Maximum door thickness: 28 mm ( $1\frac{1}{8}$ " )

## Connecting profile to the external side or cabinet body

		mm/inch	code
	Connector 55 mm (2 $\frac{3}{16}$ ") for one pivot/slide-in door, alu plain anodized, 2 pieces	650 (2'1 $\frac{19}{32}$ ")	25438
	Connector 55 mm (2 $\frac{3}{16}$ ") for one pivot/slide-in door, alu plain anodized, 1 piece	650 (2'1 $\frac{19}{32}$ ")	23221
		900 (2'11 $\frac{7}{16}$ ")	23222

## Connector for HAWA-Concepta 25/30/40/50

The Connector connection profile for the HAWA-Concepta 25/30/40/50 is a well-thought-out method of simplifying the assembly of designs with pivot/slide-in doors striking against the top and bottom cabinet sections. Assembly is not only easy but also quick and convenient: the cabinet side or body sections are placed adjacent to one another; the Connector connection profile is then inserted in the top tracks and bottom guide channels and screwed tight from above – job done.

### Features of Connector 55 mm (2 $\frac{3}{16}$ ")

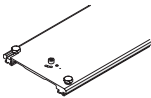

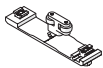

- For recesses with a pivot/slide-in door made of wood: 19–30 mm ( $\frac{3}{4}$ "–1  $\frac{3}{16}$ ")
- The Connector compensates external side or cabinet body height differences of up to  $\pm 1.5$  mm (1  $\frac{1}{16}$ ")

### Typisch Connector 110 mm (4 $\frac{11}{32}$ ")

- For recesses with two pivot/slide-in doors made of wood: 19–28 mm ( $\frac{3}{4}$ "–1  $\frac{1}{8}$ ")
- The Connector compensates cabinet body height differences of up to  $\pm 1.5$  mm (1  $\frac{1}{16}$ ")

## Connecting profile to the cabinet body

		mm/inch	code
	Connector 110 mm (4 $\frac{11}{32}$ ") for two pivot/slide-in doors, alu plain anodized, 1 piece	650 (2'1 $\frac{19}{32}$ ")	23223
		900 (2'11 $\frac{7}{16}$ ")	23224
	Connector 110 mm (4 $\frac{11}{32}$ ") for two pivot/slide-in doors, alu plain anodized, 1 piece (for installation in front of a fixed base)	26 (1 $\frac{1}{32}$ ")	23225

### Connector 55 mm (2 $\frac{3}{16}$ ")

Connector 55 mm (2  $\frac{3}{16}$ "):  
recess for one pivot/slide-in door

### Connector 110 mm (4 $\frac{11}{32}$ ")

Connector 110 mm (4  $\frac{11}{32}$ "):  
recess for two pivot/slide-in doors

## Kitchen designs with and without a fixed base

The Connector for the HAWA-Concepta 25/30/40/50 is suitable for various kitchen designs. The same connector profile can be used for the top and bottom on designs with adjustable feet. A short 26 mm (1  $\frac{1}{32}$ ") profile is available for designs with a fixed base.

Design with adjustable feet  
Top/bottom profile: No. 23223/23224

Design with a fixed base  
Top profile: No. 23223/23224  
Bottom profile: No. 23225

## HAWA-Concepta 25/30/40/50: Further design options

The HAWA-Concepta 25/30/40/50 is suitable not only for sliding doors that strike against the cabinet into the cabinet body but also for inlaying doors made. Both variants can be installed in a wall recess without a cabinet body.

### Inlaying doors

HAWA-Concepta 25/30/40/50 can also be used to design inlaying fronts.

### Guide for two inlaid doors

The optional guide also allows two doors to be pushed into one pocket, also with inset structures.

#### Guide

	code
	25680
Guide for two pivot/slide-in doors, aluminium, plain anodized	

## Door in wall recess

The HAWA-Concepta 25/30/40/50 can also conceal wall recesses without a cabinet body.

HAWA-Concepta 25/30

HAWA-Concepta 40/50

HAWA-Concepta 25/30/40/50

## Design variant: room partitioning solutions

Room-high designs for partitioning solutions are possible as the HAWA-Concepta 25/30/40/50 does not require top and bottom cabinet sections. All components are screwed onto the intermediate panel.

HAWA-Concepta 40/50

## Wood doors from 30 mm (1 3/16")

Rabbets enable the installation of wood doors with thicknesses starting from > 30–50 mm (1 3/16"–1 31/32")

### Rabbet dimensions

5 mm ( $\frac{7}{32}$ " )	26.5 mm (1 $\frac{1}{16}$ " )

## Shock absorber: high operational convenience

The shock absorber stops the door gently and quietly when it is pulled out.

## Stop cover caps and depth adjustment

The stop cover caps are screwed onto the face side of the top tracks and fulfill the following functions:

- The integrated guide roller makes it easy to pivot the door and slide it in, positioning it in the closed position
- The closed front can be aligned by 0–2 mm (0"– $\frac{3}{32}$ " ) in the depth of the cabinet
- The hardware set includes a pair of stainless steel cover caps for extra visual appeal. They simply clip on to the stop cover caps

Front depth fine adjustment

Adjustment screw cover

## Door handles

		mm/inch	code
	Door handle, alu plain anodized	400 (1'3 <sup>3</sup> / <sub>4</sub> " )	22692
Please pay attention to the collision hazard when planning door handles in connection with the Connector.			

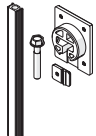

## Door handle height

The height of the door handle should be determined accordingly if two cabinet elements are designed so that the door opening of one cabinet meets with the insert of the adjacent cabinet. We recommend shell handles or flush pull handles to building owners.

Door handle	S	N5
Hawa code 22692	19 mm ( <sup>3</sup> / <sub>4</sub> " )	13.5 mm ( <sup>17</sup> / <sub>32</sub> " )
Provided by customer	≤ 22 mm ( <sup>7</sup> / <sub>8</sub> " )	10 mm ( <sup>13</sup> / <sub>32</sub> " )
	≤ 25 mm ( <sup>31</sup> / <sub>32</sub> " )	5 mm ( <sup>7</sup> / <sub>32</sub> " )
	≤ 50 mm (1 <sup>31</sup> / <sub>32</sub> " )	2 mm ( <sup>3</sup> / <sub>32</sub> " )
S = Door thickness N5 = Maximum door handle height for adjacent cabinets		

## Aligner – Set for 1 wooden door

		code
	Aligner for stabilisation of wooden sliding door, set of 2 pieces	18705
<ul style="list-style-type: none"> <li>for door thicknesses of 16–28 mm (<sup>5</sup>/<sub>8</sub>"–1 <sup>1</sup>/<sub>8</sub>" )</li> <li>for door heights up to 2600 mm (8'6 <sup>3</sup>/<sub>8</sub>" ) (not suitable for solid hardwood)</li> </ul>		

## Aligner

The alignment hardware makes it easy to stabilise and adjust the pivot/slide-in doors. At least two hardware sets are recommended for each door and can be shortened as required.

## Order specifications

- Type and quantity of sets

## Optional order specifications

- Quantity of connecting brackets for external or cabinet body connections
- Quantity of door handles
- Quantity of aligner

## Planning/installation

For planning and installation purposes, please use the installation drawings:

**Flush when closed, completely open.**

**Hardware for bi-folding cabinet pocket doors up to 25 kg (55 lbs.) per door.**

## Description

Flush cabinet fronts can be fully opened with HAWA-Folding Concepta 25. Two doors can be folded and slid into furniture cabinets or wall niches at either the side. Systems with one pair of folding doors at both sides can be realized without separating walls using the optional reinforcement profile. Sets with a track length of 2120 mm also make 3-door cabinet fronts possible in combination with HAWA-Concepta.

## Applications

Its advantages are obvious wherever variable room utilisation and unobstructed access should leave a tidy impression, for instance in the home office in the bedroom, the kitchen in the living room, or the utility area in the bathroom.

## Features of the HAWA-Folding Concepta 25

- Max. door weight: 25kg (55lbs.) [per pair of panels 50kg (110lbs.)]
- Door width: 300–700 mm ( $11\frac{13}{16}$ "– $2'3\frac{9}{16}$ " )
- Door height: 1250–2600 mm ( $4'1\frac{7}{32}$ "– $8'6\frac{3}{8}$ " )
- Door thickness: 19–26 mm ( $\frac{3}{4}$ "– $1\frac{1}{32}$ " )
- Flush-fitting fronts with the gap pattern that is normal in furniture construction make discreet integration into the overall appearance possible
- Harmonious, quiet movement due to playfree guidance of the upright
- Sheer elegance outside and in due to black anodized profiles
- Two-piece, four-piece and, in combination with HAWA-Concepta, three-piece fronts are also possible
- The pair of folding doors can be slid in flush with the outside
- Room-high without furniture tops provides an extraordinary, spacious appearance
- All adjustments can be made from the front at any time
- LGA certificate

## Calculation hardware depth

T2	TH	E2
≤ 680 mm ( $26'0\frac{49}{64}$ " )	1250–1850 mm ( $4'1\frac{7}{16}$ "– $6'0\frac{27}{32}$ " )	≤ 607 mm ( $23'0\frac{57}{64}$ " )
≤ 680 mm ( $26'0\frac{49}{64}$ " )	1851–2600 mm ( $6'0\frac{7}{8}$ "–( $8'6\frac{3}{8}$ " )	≤ 607 mm ( $23'0\frac{57}{64}$ " )

## Design options

Different projects can be realized with different structural versions. Not only walk-in closets or niches which extend from floor to ceiling but also half-height solutions are possible from the worktop to the ceiling. The large area that can be covered is impressive. In this way, three-door fronts with an opening width of 2100 mm and 2800 mm wide fronts with two pairs of folding doors can be opened and accommodated in the depth of the furniture in combination with HAWA-Concepta.

## Aesthetics

Important requirements in modern architecture such as room-high, flush-fitting and walk-in can be easily realized with HAWA-Folding Concepta 25.

Sheer elegance – outside and in, made possible by the black anodized profiles. These incorporate themselves discreetly into the furniture. For more design freedom in high-quality furniture, without design compromises.

## Base profile and centering

			mm/inch	code
	Base profile complete including cover cap, leading ramp and drilling jig	alu plain anodized	1300 (4'3 $\frac{3}{16}$ " )	24004
			2000 (6'6 $\frac{3}{4}$ " )	25481
		alu black anodized	1300 (4'3 $\frac{3}{16}$ " )	25479
			2000 (6'6 $\frac{3}{4}$ " )	25480
	Magnetic centering part, alu plain anodized, including drilling jig			24006

## Door positioning / door centering

The base profile is the ideal complement to the HAWA-Folding Concepta 25. The leading ramp included in the set brings the overlaying cabinet front flush into position. Doors on recess designs or walk-in cabinets without a cabinet base are centered by magnetic centering parts no. 24006.

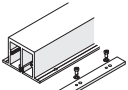

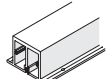

Flush door positioning with base profile and leading ramp

Flush door positioning with magnetic centering parts

## Reinforcement profile / Connection plate

		mm/inch	code
	Reinforcement profile incl. top track connection plate, alu plain anodized, predrilled	2600 (8'6 $\frac{3}{8}$ " )	24322
	Reinforcement profile, alu plain anodized, predrilled	cut to size	24281
	Top track connection plate, alu plain anodized, predrilled		24321

## Reinforcement profile / Connection plate

Thanks to the optionally available profile for reinforcing the cabinet top, three and four door systems without separating walls can be realized.

Profile, pre assembled

Profile can be fitted retroactively from below

Custom solution

## Three-door cabinet fronts

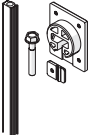

The sets with 2120 mm long running tracks make it possible to combine HAWA-Folding Concepta and HAWA-Concepta. This means that nothing stands in the way of 3-door systems without separating walls.

## Four-door cabinet fronts

4-door cabinets without separating walls can be realized with a HAWA-Folding Concepta on the left and the right. This makes opening widths of up to 2800 mm possible without separating walls.

## Aligner – Set for 1 wooden door

	code
 <p>Aligner for stabilisation of wooden sliding door, set of 2 pieces</p>	18705
<ul style="list-style-type: none"> <li>for door thicknesses of 16–28 mm (<math>\frac{5}{8}</math>"–<math>1\frac{1}{8}</math>" )</li> <li>for door heights up to 2600 mm (<math>8'6\frac{5}{8}</math>" )</li> <li>(not suitable for solid hardwood)</li> </ul>	

## Aligner

The alignment hardware makes it easy to stabilise and adjust the folding/slide-in doors. At least two hardware sets are recommended for each door and can be shortened as required.

## Lock catch for espagnolette lock TERZA

	code
 <p>Lock catch and bracket for espagnolette lock TERZA, 2 pieces for 1 pair of folding doors</p>	24005
<ul style="list-style-type: none"> <li>For cabinet designs without a ceiling connection</li> <li>Lock catch for espagnolette lock TERZA 3017 to be ordered by the building owner. (<a href="http://www.heusser-schloss.ch">www.heusser-schloss.ch</a>)</li> </ul>	

## Lock catch for espagnolette lock

The lock catch from Hawa and the commercially available espagnolette lock TERZA 3017 from Heusser make cabinet fronts lockable.

## Assembly simplification features

The corpus and side connection profiles included in the HAWA-Folding Concepta 25 set make it easier to design cabinet bodies with overlaying cabinet fronts. The top track and base profile also make for easier installation as they are fitted to the cabinet corpus from the front. They can also be fitted retrospectively across a number of previously installed cabinet corpus.

## Door handle / door position

Commercially available bow handles enable convenient, one handed operation of folding/slide-in doors. The folding door pair can be pushed in fully flush with the external side.

The alu profile between the bi-folded door pair discreetly conceals the strap hinges

## Installation tip

The cabinet must be levelled and anchored to the building to achieve the best possible functionality and operating convenience.

## Order specifications

- Type and quantity of HAWA-Concepta sets
- With 3-door systems, type and quantity of HAWA-Concepta sets
- Quantity of bottom profile or
- Quantity of magnetic centering part

## Optional order specifications

- Quantity of reinforcement profile
- Quantity of lock catch for espagnolette lock TERZA 3017
- Quantity of aligner

## Planning/installation

For planning and installation purposes, please use the installations drawing code 25739.

**Furniture hardware system for sliding folding cabinet/wardrobe doors which can be freely moved to and fro. Panel weight up to 30 kg (66 lbs).**

## Description

With the HAWA-Multifold 30, two cabinet/wardrobe doors can be folded as panel pairs and moved to and fro. The number of panel pairs is not limited. Several pairs of panels can be joined using an adapter. Cabinet designs can incorporate inlaying, semi-overlaying and overlaying cabinet doors. The side panels, top, bottom and shelves are all the same width. The cupboard interior space is not restricted by any protruding hardware elements. A horizontal brush seal in the top track and bottom guide channel protects against dust and deadens impact noise. For the centre groove a rubber seal can be used which protects the cupboard interior and hinges against dust. The panel pairs can be locked with a furniture bar bolt lock. The hardware system is also suitable for fixing the panels on the side.

## Applications

This hardware system is suitable for use in interior design and furniture manufacturing wherever quality and simple operation with extremely smooth and stable running is required, e.g. interiors, hotels, etc.

## Features of the HAWA-Multifold 30

- Maximum panel weight 30 kg (66 lbs.), panel pair 60 kg (132 lbs.)
- Maximum panel heights 2600 mm (8'6<sup>3</sup>/<sub>8</sub>" )
- Panel widths – free slideable, 200–500 mm (7<sup>7</sup>/<sub>8</sub>" – 1'7<sup>11</sup>/<sub>16</sub>" )
- Panel widths – side hinged, 200–650 mm (7<sup>7</sup>/<sub>8</sub>" – 2'1<sup>19</sup>/<sub>32</sub>" )
- Panel thicknesses 19–25 mm (3<sup>3</sup>/<sub>4</sub>" – 63<sup>3</sup>/<sub>64</sub>" )
- Vertical groove width 3–5 mm (1<sup>1</sup>/<sub>8</sub>" – 13<sup>1</sup>/<sub>64</sub>" )
- Vertical adjustment ± 2 mm (3<sup>3</sup>/<sub>32</sub>" )

## Walk-in cabinet

A walk-in cabinet version is also possible. Please see also HAWA-Multifold 30/W.

## Planning/installation

Please use the corresponding installation instructions: 15042 for folding panel pairs that are to be freely moved to and fro 14826 for folding panel pairs that are to be attached to the side Each set of tracks contains installation instructions. (→ [www.hawa.ch](http://www.hawa.ch) → HAWA-Productfinder)

**Hardware system for walk-in cabinet, hinged on one side, without floor guide, up to 30 kg (66 lbs.). (inlay or overlay)**

## Description

The HAWA-Multifold 30/W is a supplement to the HAWA-Multifold 30 with inlaying or full overlay sliding cabinet doors. It is attached on one side with concealed hinges and does not need a bottom guide. The hardware can be used for sliding to the left and right.

## Applications

For use in interiors wherever quality and simple operation are required together with extremely smooth and stable motion, e.g. interior design, hotels, etc.

## Features of the HAWA-Multifold 30/W

- Maximum panel weight 30kg (66 lbs.) per panel pair 60 kg (132 lbs.)
- Maximum panel heights 2600 mm (8'6 $\frac{3}{8}$ " )
- Panel widths 200–500 mm (7 $\frac{7}{8}$ "–1'7 $\frac{11}{16}$ " )
- Panel thicknesses 19–25 mm ( $\frac{3}{4}$ "– $\frac{63}{64}$ " )
- Vertical groove width 3–5 mm ( $\frac{1}{8}$ "– $\frac{13}{64}$ " )
- Vertical adjustment  $\pm 2$  mm ( $\frac{3}{32}$ " )

## Construction

Designs incorporating inlaying and overlaying doors are possible.

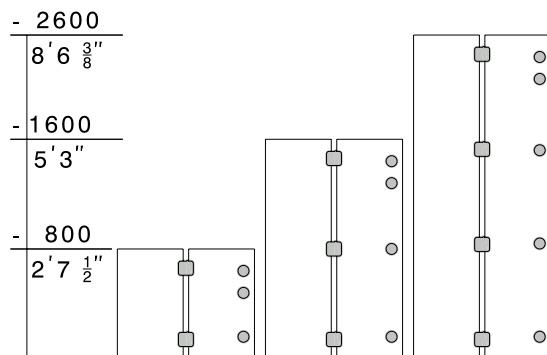

Overlaying doors

Inlaying doors

## Arrangement and number of hinges

HAWA-208 40-70/IS  
HAWA-209 40-70/MS

## Soft closing system for furniture doors

### Description

The soft closing system closes furniture doors softly and quietly, pulls them gently into their final position and holds them firmly in place. The soft closing system is mounted in the fully assembled sliding door cabinet after the doors have been fitted and aligned.

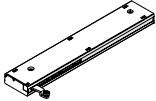

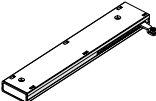

## Features of the soft closing system for furniture doors

- Depending on the system, door weight up to 80 kg (176 lbs.)
- Minimum door weight 20 kg (44 lbs.)
- Simple and easy installation – retrofitting possible

### Soft closing system

	code
Soft closing system, 1 pair for 2-door cabinet	21095

**Set comprising**

		code
	Soft closing system for left-hand furniture doors, plastic grey	20815
	Soft closing system for right-hand furniture doors, plastic grey	20816
	Driver for soft closing system for left-hand furniture doors	21218
	Driver for soft closing system for right-hand furniture doors	21219
	Adapter for soft closing system, for furniture doors, incl. set of fixing screws, outer door	21216
	Adapter for soft closing system, for furniture doors, incl. set of fixing screws, inner door	21217
	Positioning gauge for soft closing system, for furniture doors	21265

### Cover cap for soft closing system for furniture doors

		pieces	code
	Cover cap for soft closing system for furniture doors, dull chromium finish	1	20810
		2	21097

## Order specifications

- Quantity of sets
- Quantity of cover caps for the soft closing system

## Planning/installation

For planning and installation purposes, please use the installation drawing code 21210. (→ [www.hawa.ch](http://www.hawa.ch) → HAWA-Productfinder)

## Application

## Aligner for stabilisation of sliding doors

### Description

The aligner provides a simple way to avoid flexure in sliding door panels. We recommend mounting at least two per panel. Aligners may be cut to length where necessary.

### Features of the Aligner

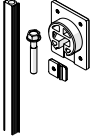

- Door thickness 16–28 mm ( $\frac{5}{8}$ "– $1\frac{1}{8}$ " )
- Maximum door height 2600 mm ( $8'6\frac{3}{8}$ " )
- Pre-mounted hexagon screw in fastening strip
- Not suitable for solid hardwood

## Mounting examples

Ø 35x11 = Door machining

## Aligner – Set for 1 wooden door

	code
	18705

## Mounting

## Order specifications

- Quantity of door sets

## Planning/installation

An installation drawing is supplied with the hardware.

## 1. General information

- 1.1 These General Terms and Conditions apply to all contractual arrangements entered into with Hawa Sliding Solutions AG, Mettmenstetten, Switzerland (Hawa), and they constitute an integral element of these contractual arrangements. **Hawa does not recognize contractual partners' contrary or alternative terms and conditions.**
- 1.2 In order to be valid, all agreements made between the contractual parties must be made in writing, especially in the case of any deviations from these General Terms and Conditions.
- 1.3 Third parties not party to the contract shall have no entitlement to the assertion of any provisions whatsoever of these General Terms and Conditions.
- 1.4 If any individual provisions contained in these General Terms and Conditions are deemed by a competent authority to be wholly or partially invalid or unenforceable, this shall not affect the remaining provisions or the remainder of the questionable provisions of these General Terms and Conditions.

## 2. Deliveries

- 2.1 Purchase orders shall only be binding on Hawa, if it has confirmed these in writing. If no specific time or date has been agreed for the delivery of supplies and services, Hawa shall deliver these in accordance with its standard business operations.
- 2.2 In the event of any ambiguities or disagreements concerning the content of a purchase order, Hawa's written order confirmation shall be authoritative, unless the contractual partner has raised an objection to the order confirmation within 24 hours (Monday–Friday), (this time limit shall be correspondingly extended if it expires on a weekend).
- 2.3 Hawa shall only be bound by dates and time limits for the delivery of supplies and services, if these have been defined in writing and confirmed by Hawa in a binding manner. Hawa's fulfilment of dates and time limits is conditional on the timely receipt of all the documents and releases required from the contractual partner and the fulfilment of all its other obligations. Dates and time limits shall otherwise be appropriately extended.
- 2.4 In the event that Hawa fails to meet confirmed dates and time limits, the contractual partner must afford it a reasonable additional period of time to deliver performance. If Hawa also fails to render delivery within this additional period of time, the contractual partner shall be entitled to rescind the agreement and demand the repayment of all payments already made. **The contractual partner shall have no fartherreaching rights or claims, especially not to any compensation for delayed performance, or for indirect or third-party damage.**
- 2.5 Hawa is entitled to make partial deliveries. In the event that the contractual partner is in default of payment, Hawa shall be entitled to withhold other agreed supplies and services, until all outstanding payments have been settled, and adequate collateral has been provided in respect of future supplies and services. The contractual partner has no right of rescission in the event that a delivery is withheld due to a default of payment.
- 2.6 Subject to any alternative agreement concluded between the contractual parties, deliveries shall be made ex Hawa's warehouse at the cost and risk of the contractual partner (see too No. 3.2). Return consignments of goods require the explicit, prior consent of Hawa. In this case, there will be a credit up to a maximum of 65 % of the product value. The contractual partner shall bear the costs of shipment and processing of return consignments (incoming goods inspection, including packaging, etc.). Custom-made products may not be returned.
- 2.7 Unless agreed otherwise with the contracting partner, the delivery terms shall be interpreted in accordance with Incoterms 2010 (International Commercial Terms), of the International Chamber of Commerce (ICC).

## 3. Prices and conditions of payment

- 3.1 Agreements concerning prices, cash discounts and rebates, etc. shall only be binding on Hawa if agreed in writing. Otherwise the prices contained in Hawa's current price list or order confirmations shall apply. Hawa may amend these price lists at any time. The current price lists shall apply. Prices are listed in Swiss Francs (excluding VAT), unless otherwise explicitly agreed in writing.
- 3.2 Hawa reserves the right to pass on freight charges. The full freight or postage charge will be invoiced for express, postal or direct consignments. All taxes and charges will be passed on. Hawa reserves the right to charge packaging at cost price. Any requests for special packaging shall be charged separately.
- 3.3 Payment is deemed made, once the relevant amount is credited to Hawa's account. In the event of a default of payment, Hawa shall be entitled, without having to issue a reminder, to charge interest from the 31st day following the invoice date, at the rate charged by commercial banks on current account overdrafts, but no less than 5% in any case.
- 3.4 The contractual partner's payments will firstly be applied against the oldest outstanding payments. If costs and interest have already accrued, payments shall first be credited against the costs, then the interest, and finally against the principle debt.
- 3.5 Payments due to Hawa may only be offset against the contractual partner's counter-claims, if Hawa has consented to this or if a res judicata decision has been issued to this effect.

## 4. Retention of title

- 4.1 The delivered goods shall remain the property of Hawa, until the payment of all of Hawa's claims against the contracting partner (including the settlement of all outstanding current account balances). In the event that various goods are combined, the retention of title shall endure in the relevant proportion of the value of the new goods. Hawa is entitled, without any involvement on the part of the contractual partner, to register the retention of title in the retention of title register («Eigentumsvorbehaltsregister») of the competent debt enforcement office, and the contractual partner authorizes Hawa to undertake the actions necessary for this purpose.

- 4.2 If the contractual partner resells the goods prior to the fulfilment of all of Hawa's claims, **it here and now, by way of precaution, assigns to Hawa** (irrespective of any legally valid retention of title) **the corresponding claims established by way of the resale or arising through any other legal basis.**
- 4.3 In the event of any third-party interference with the goods subject to a retention of title arrangement, the contracting partner shall be duty bound to indicate Hawa's ownership of said goods, and notify Hawa accordingly.
- 4.4 In the event of default of payment on the part of the contractual partner, Hawa shall be entitled to repossess the goods delivered. Hawa's repossession of goods shall not constitute any termination of the agreement, and will not release the contractual partner from its contractual duties.

---

## 5. Product performance, obligations to provide information and instructions

- 5.1 Unless the product performance is described in Hawa's current catalogues, brochures or service descriptions etc., the specifications of the specific products must be agreed with Hawa in writing. Unless an agreement has been made to the contrary, the technical specifications may be changed at any time.
- 5.2 The contractual partner acknowledges that the fitness for purpose of the products is dependent on a wide range of factors, and it undertakes to read the relevant design and assembly instructions.
- 5.3 In order to fulfil its obligations to provide information and instructions, Hawa provides contracting partners (usually specialist dealers, architects, designers, consultants, workshops/tradesmen, etc.) with catalogues, brochures, design and installation manuals, maintenance manuals, operational advice and training.
- 5.4 Contractual partners are duty bound to observe Hawa's product information. All requisite instructions are available on Hawa's website, or can also be requested from Hawa. They must be passed on to workshops/tradesmen and users as necessary.

---

## 6. Drawings and tools

- 6.1 Hawa reserves ownership to construction drawings prepared and issued by it specifically for a particular job. Unless Hawa has issued its consent, these may not be passed on to any other parties, or copied or otherwise reproduced.
- 6.2 Tools produced for special orders shall remain the property of Hawa. The contractual partner will not be able to demand them, even if it has contributed to the tool costs. Special agreements reserved.
- 6.3 Hawa shall not be liable for any and all consequences resulting from patent or other property right infringements resulting from deliveries made in accordance with the contractual partner's instructions. The contractual partner undertakes to indemnify Hawa fully and unreservedly in such cases.

---

## 7. Warranty of title, product warranty, liability

- 7.1 Hawa guarantees that the products do not violate the intellectual rights of any third parties.
- 7.2 The contracting partner must inspect supplies and services for defects immediately upon receipt. Hawa must be promptly notified of any complaints; otherwise the purchased goods are deemed accepted.
- 7.3 With the exception of parts subject to wear and tear, Hawa warrants the flawless functioning of the products delivered by it, as well as the durability of all parts, for a period of 2 years commencing from the transfer of risk. This product warranty does not include damage due to natural wear and tear, improper use, failure to observe installation and maintenance instructions, changes to the goods as delivered or to spare parts that do not correspond to Hawa's original specifications.
- 7.4 Hawa may demand that the contracting partner return parts about which a complaint has been justifiably made; this shall be performed at the partner's **cost** and risk. Defects affecting parts of a delivery do not entitle the contractual partner to reject or return the entire delivery.
- 7.5 In the case of justified complaints, the contracting partner is entitled to subsequent improvement (repair) or replacement of the defective part (the decision resting with Hawa). Subsequent improvements or substitute deliveries performed by Hawa are covered by the same product warranty that Hawa extended to the original delivery, except this shall be limited in time to 6 months following the acceptance of the subsequent improvement or the receipt of the substitute delivery.
- 7.6 **All other liability**, irrespective of the legal basis, **is explicitly repudiated**, insofar as this is legally permissible. This applies particularly to indirect and third-party damage.

---

## 8. Applicable law, legal venue

- 8.1 All contractual agreements concluded with Hawa shall **be exclusively governed by Swiss law** to the exclusion of the rules on the conflict of laws, and the United Nations Convention on Contracts for the International Sale of Goods (CISG).
- 8.2 **The exclusive legal venue** for all disputes arising from or in connection with the contractual agreements between Hawa and the contractual partner **shall be that court with jurisdiction for the place at which Hawa has its registered address. Hawa is also entitled to pursue legal actions against the contractual partner before that court with jurisdiction for the place at which the latter has its registered address.**
