

CATALOGO GENERALE
GENERAL CATALOGUE

CONFALONIERI

Gruppo Confalonieri, con il brand storico Confalonieri, dal 1950 produce accessori e complementi per il mobile e l'arredamento; da sempre persegue un approccio al prodotto che pensa innanzitutto all'aspetto funzionale ed ergonomico che si concretizza, al termine del processo, in un buon oggetto di design.

L'obiettivo non è, dunque, la forma fine a sé stessa, ma una soluzione di design capace di integrare la funzionalità tipica di un prodotto utile e facilmente utilizzabile. L'attenzione alle tendenze e all'evoluzione del mobile e dell'arredamento più in generale, è alla base del progetto di Confalonieri, per consentire il dialogo tra il mobile stesso e l'accessorio.

Seguendo questo approccio, la maniglia talvolta è un'impugnatura caratterizzante, talaltra una variazione della superficie dell'anta o un elemento basico rispettoso di pulizia e linearità; sempre, una soluzione originale per l'apertura del mobile.

La gamma di Confalonieri si è arricchita nel tempo con soluzioni per tutti gli ambienti e risposte alle diverse esigenze di utilizzo.

I prodotti Confalonieri vengono concepiti e progettati in Italia e industrializzati internamente seguendo i dettami dell'italian style. L'eccellenza è assicurata dal know-how specialistico acquisito in decenni di esperienza e attraverso il costante controllo della qualità lungo tutto l'arco dei processi produttivi.

Gruppo Confalonieri, with its historical brand Confalonieri, since 1950 produces accessories and complements for furniture and all the furnishing sector, unwaveringly approaching the product with special focus on the functional and ergonomic features that make a quality design item.

Hence, the goal is not form in itself, but a design solution that merges the functional traits typical of a product that is both useful and designed for easy use.

A keen study of trends and evolution of furniture underpins project Confalonieri to create interaction between the item of furniture and the accessory.

Following this approach, the handle can act, at times, as a characterizing grip, and at other times as a variation on the door surface or as a clear-cut linear basic element. Unfailingly an original solution for opening the furniture item.

Confalonieri range has been enriched over time with solutions for all environments and responses to different user requirements.

Concept, engineering, development of equipment, industrialization, take place internally, following the Italian-style approach. Excellence is also guaranteed thanks to the specialized knowhow acquired over decades of experience and the constant quality checks carried out throughout the entire production process.

customer will apply the insert of the material he prefers (laminate, wood, other decorative material...)

Matrix collection

Design: FABIO CASIRAGHI_PAOLO NAVA DESIGN STUDIO

60

“ con Matrix, la maniglia non è più un mero elemento decorativo, piuttosto una parte dell'intero, capace di mimetizzarsi, coordinarsi, contrastare, arricchire o stupire. In ogni caso di appartenere al progetto stesso.

”

La maniglia con Matrix non è più forma ma supporto di finitura, la forma diventa neutra per raccordarsi con le forme del mobile e la maniglia diviene superficie materica o per sua finitura o per il materiale che supporta.

Con Matrix la maniglia diventa un elemento a disposizione del progetto. E' personalizzabile; il decorativo utilizzato dal produttore del mobile può essere applicato sulle maniglie per mantenere continuità di finitura. E' anche possibile supportare una stampa digitale personalizzata (un disegno, un logo, una scritta, una foto...).

Con Matrix è possibile utilizzare le maniglie rendendole invisibili o per richiamare il decorativo utilizzato su un'altra parte del mobile.

61

“ with Matrix, the handle is no more a decorative element only, rather a part of the whole, sometimes capable to camouflage, coordinate, counteract, enrich or surprise. In each case the handle belongs to the same project.

”

The handle with Matrix is no longer shape, rather a finishing support, the shape becomes neutral to match furniture lines and the handle becomes a material surface as for its finish or for the material it supports. The furniture handle with Matrix becomes an element available for the furnishing project. It is customizable; the decorative used by the furniture manufacturer can be applied on the handles to maintain continuity of the finishing. It is also possible to support a personalized digital print (a drawing, a logo, a text, a photo ...).

With Matrix it is possible to use the handles making them invisible or to recall the decorative used on another part of the piece of furniture.

Matrix collection

Design: FABIO CASIRAGHI_PAOLO NAVA DESIGN STUDIO

62

Esempio di utilizzo di Matrix "tono su tono" con le maniglie che risultano invisibili.
Example of Matrix application with same color or material so to have an camouflaging approach.

63

Applicazione di Matrix con inserto in ardesia a richiamare il top nella stessa finitura.
Application of Matrix handles with slate inlay to recall the kitchen top in same finishing.

Esempio di utilizzo di Matrix con le maniglie utilizzate in modo da richiamare la finitura opposta presente nella composizione del mobile.
Example of Matrix with handles used as to recall the second finishing used in the furniture composition.

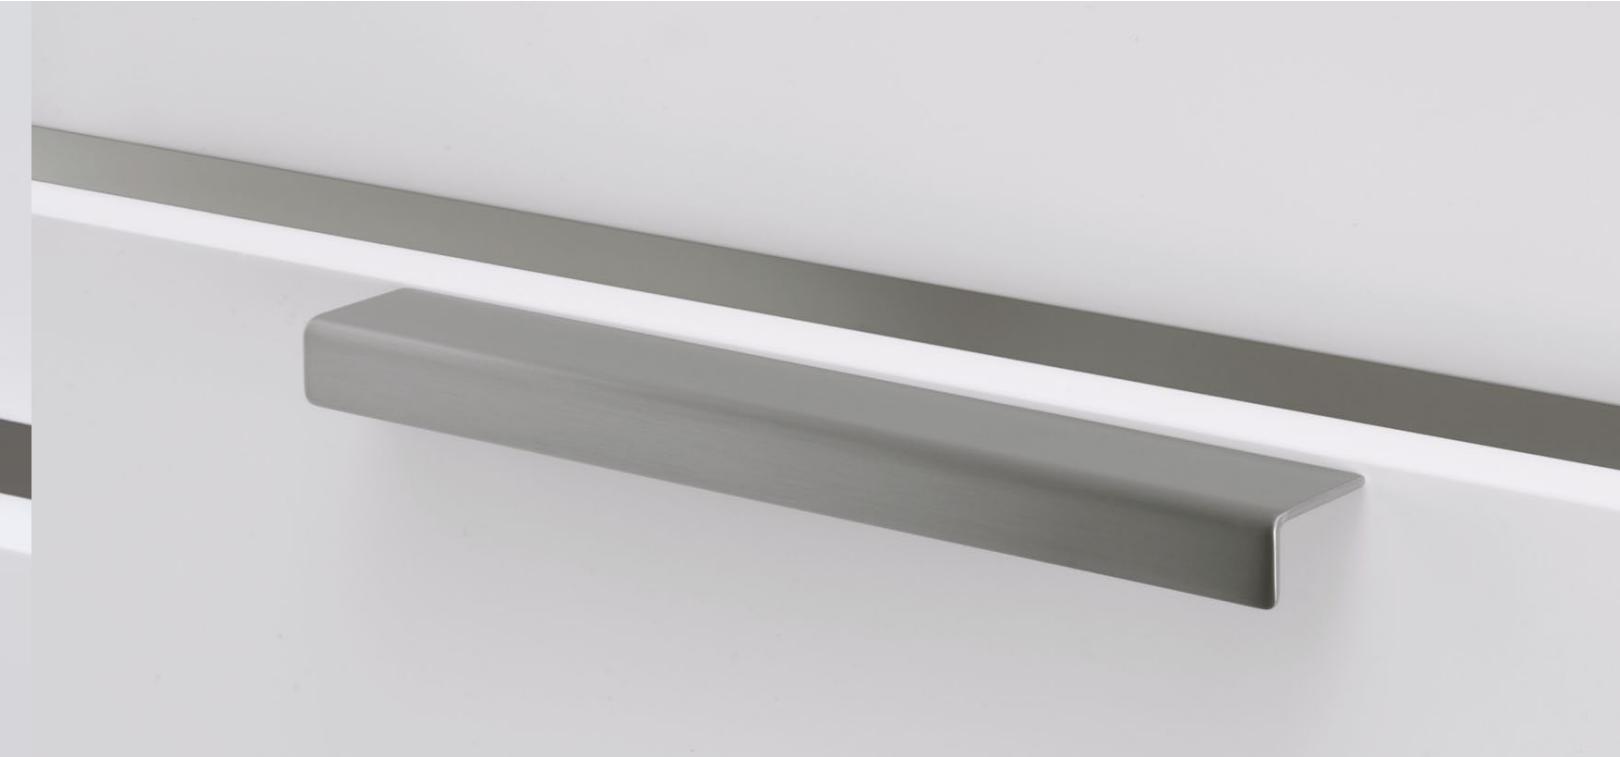

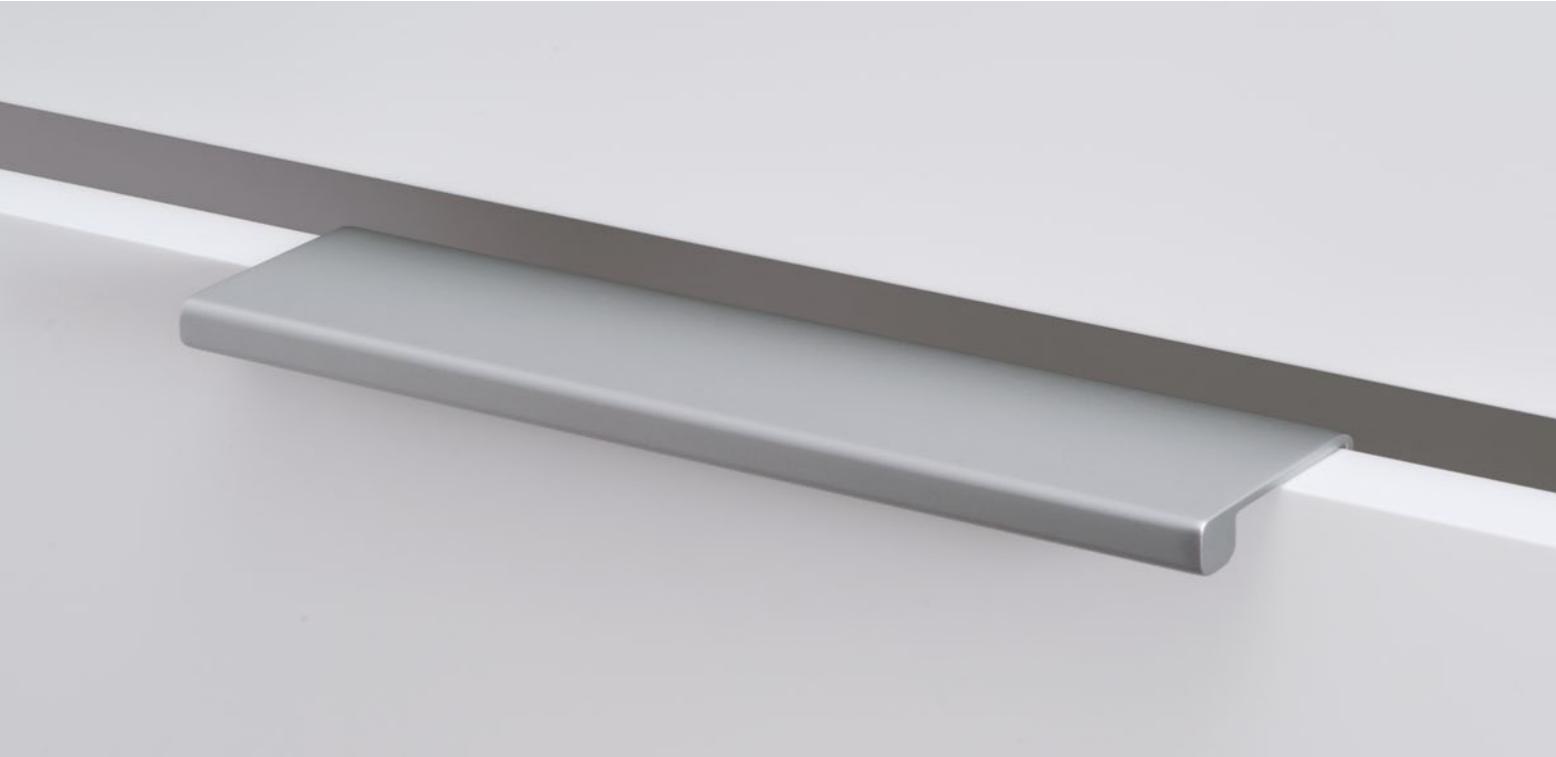

Applicazione di Matrix con inserto in cemento a richiamare il top nella stessa finitura.
Application of Matrix handles with concrete inlay to recall the kitchen top in same finishing.

note
Maniglia con un'elegante sezione a "L" che viene fissata sul retro con viti mordenti. Il suo profilo garantisce un'ottima presa e un utilizzo di spessore anta da 14 a 25. La maniglia può essere applicata in sormonta del bordo e del retro o incassata.

notes
Handle with an elegant "L" section that allows back fixation. Its profile provides an excellent grip and an application on door with thickness between 14/25 mm. The handle can be applied overlapping edge and back or recessed.

(page 177)

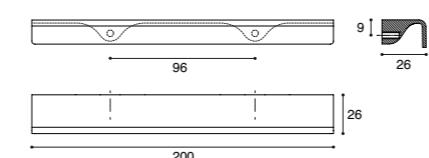

note
È una maniglia dal fissaggio tradizionale ma progettata in maniera tale da poter essere applicata anche a filo del perimetro dell'anta grazie ai fori di fissaggio abbassati. I punti di fissaggio sono nascosti al centro e sul lato mostra solo una "L" simulando un lamierino molto leggero.
Al di là di questo suggerimento può essere liberamente posizionata in qualsiasi punto dell'anta (si consiglia applicazione orizzontale).

notes

It is a conventional handle but designed to be applied also flush with the perimeter thanks to the lowered fixing holes. The attachment points are hidden in the center and by the side it shows only a "L" simulating a very lightweight section.
Beyond this suggestion can be freely positioned in any part of the door (we recommend horizontal applying).

MB09150/A

MB09150/B

note

Maniglia da incasso su bordo anta/cassetto. L'incasso avviene praticando due fori ad interasse 128 mm sul bordo per i perni presenti sulla maniglia (si consiglia un goccio di colla/silicone per fissarla). L'incasso può essere a filo (praticando una fresaata sul bordo dello stesso disegno della maniglia) oppure con leggero sormonto facendo solo i 2 fori per i perni. Ne risulta un effetto molto elegante, con la vista di un piccolo spessore ma che al tempo stesso garantisce un'ottima presa. Può essere montata sia in orizzontale che in verticale.

notes

Flush handle on door/drawer edge. The application is done by making two holes at 128 mm ctc dist. on the edge to insert the handle pins [we recommend a drop of glue/silicone to secure it]. It can be fixed completely flush or with slight overlap. The result is a very elegant effect, with the view of a small thickness in the front, but providing an excellent grip at the same time. It can be mounted either horizontally or vertical.

MANIGLIE DA INCASSO

FITTED-HANDLE

112

materiale
metallo pressofuso

material
die-cast metal

finiture
cromo lucido
nickel satinato

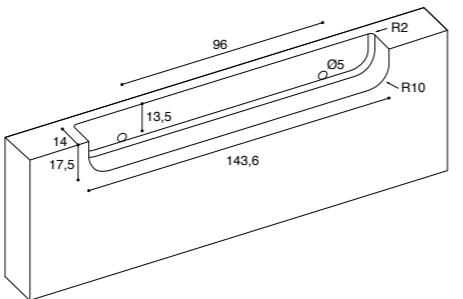

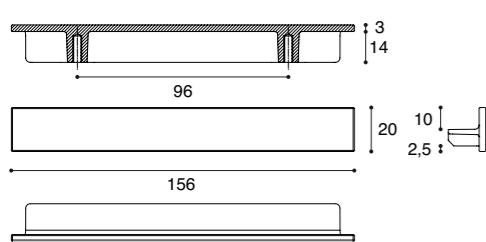

finishings
polished chrome
satin finish nickel

finiture disponibili
(pag. 176)
finiture innovative
(pag. 177)

available finishings
(page 176)
innovative finishings
(page 177)

note
Maniglia da incasso sul bordo anta/cassetto con fissaggio int.96 mm. Una maniglia che mantiene un'assoluta pulizia dell'anta.
Lo scasso viene realizzato con un solo passaggio della fresa seguendo il disegno della maniglia. Può essere posizionata sia in orizzontale che in verticale.

notes
Fitted handle to be fixed on the door/drawer edge, with fixing ctc dist. 96 mm. The handle keep an absolute cleanliness of the door.
The recess is made with a single machining passage following the design of the handle. It can be positioned both horizontally and vertically.

matt white

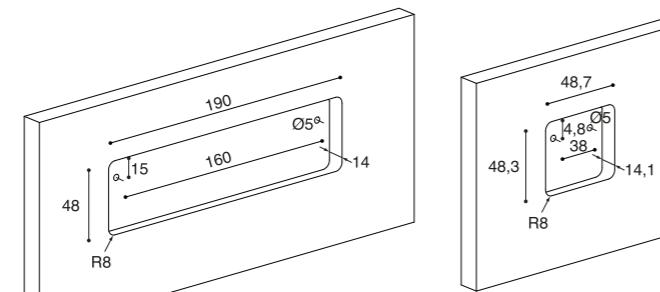

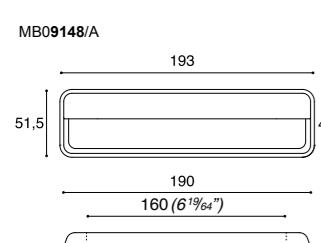

available finishings
(page 176)
innovative finishings
(page 177)

note

Nella finitura bianco opaco, è possibile laccare in autonomia la maniglia come l'anta del mobile offrendo così una maggiore integrazione. Poiché la maniglia è costituita da due parti separate (impugnatura e fondello), è possibile creare in autonomia una finitura diversa ("tono su tono" o in contrasto) tra l'impugnatura e il fondello.

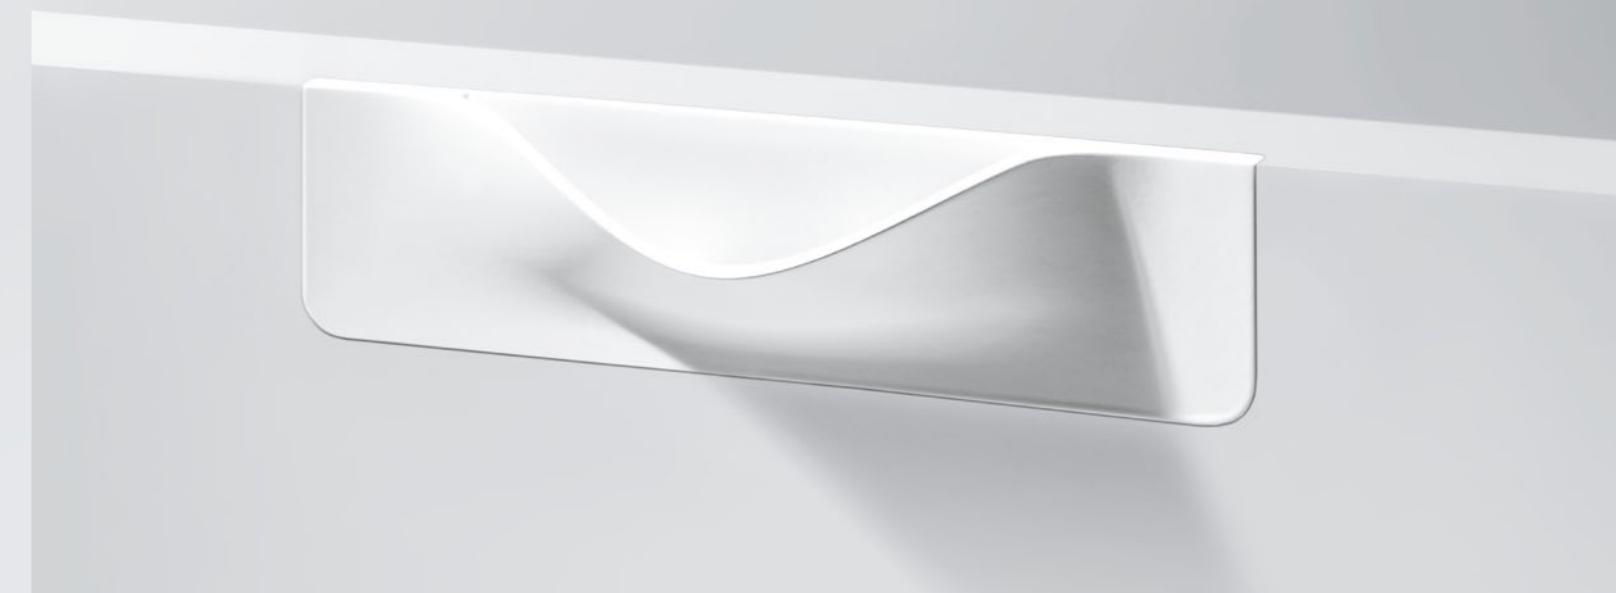

notes

In the matt white version the handle can be lacquered by the customer like the door to ensure better integration. Since the handle has two separate sections, grip and base can feature different finish created by the customer.

note
Incasso "a filo" dell'anta o "in appoggio". Nella finitura bianco opaco, è possibile laccare in autonomia la maniglia come l'anta del mobile offrendo così una maggiore integrazione. Poiché il fondo della maniglia è una parte separata, è possibile laccarlo in autonomia in contrasto o "tono su tono" con la finitura del mobile.

notes
"Flush" built into the door or "affixed". In the matt white version the handle can be lacquered by the customer like the door to ensure better integration. Since the handle's back is a separate item, the customer can lacquer it in the same-shade or a contrasting back compared to the finish of the furnishing item.

+ 1 fitted handle

come funziona

completamente integrata e
facile da installare sull'anta,
Touch è utilizzabile sia in
verticale (con applicazione su
armadi) che in orizzontale (su
ante e cassettoni);
in entrambi i casi, la maniglia
può coincidere con la
lunghezza dell'anta o del
cassettone. Quando premuta,
Touch dà accesso
ad una rientranza ricavata
nell'anta stessa; cessata la
pressione, ritorna in posizione
di riposo grazie ad un sistema
meccanico.

this is how it works

fully integrated and easy to
install in the door, Touch can
be used both in vertical (with
application in cabinets) and
horizontal position (on doors
and drawers). In both cases,
the handle may coincide with
the length of the door or
drawer.
Simply with hand pressure,
Touch opening system provides
access to a recess in the door
itself, the pressure ceased, it
returns to rest position through
a mechanical system.

Touch/Soft system

international patent pending
brevetto internazionale depositato

come appare

Design molto pulito,
con il medesimo materiale e
finitura del mobile.
Il sistema di apertura Touch/
Soft, è posto sul retro dell'anta
e risulta completamente
nascosto nello spessore
stesso del legno (min 22 mm).

Touch/Soft garantisce la
perfetta complanarità della
superficie frontale della
maniglia rispetto all'anta e
offre una copertura posteriore
per mascherare e rendere
cieca la fessura che si forma
tra maniglia e anta stessa.

Con il suo design semplice,
Touch/Soft è il perfetto
connubio tra funzionalità
ed estetica ricercata. Il
primo sistema di apertura
che preserva la pulizia
architettonica del mobile e che
non necessita di accessori.

this is how it appears

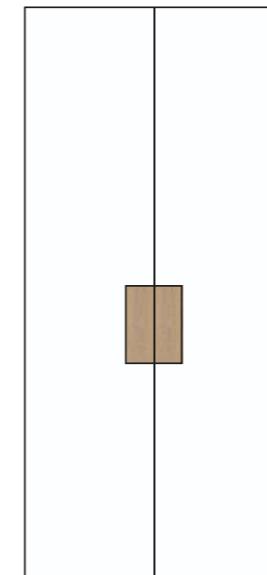

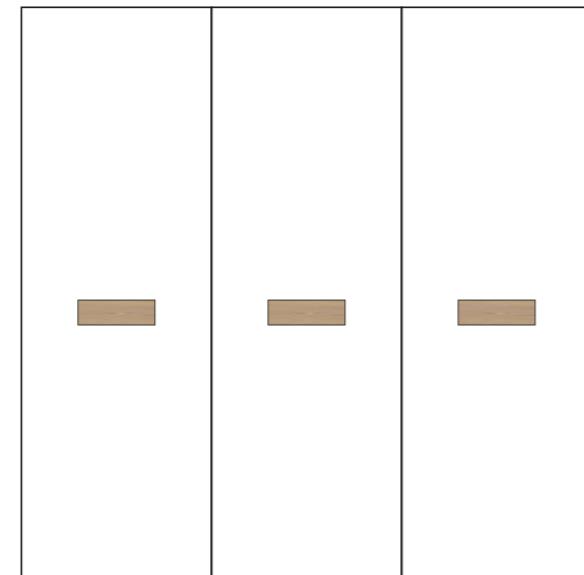

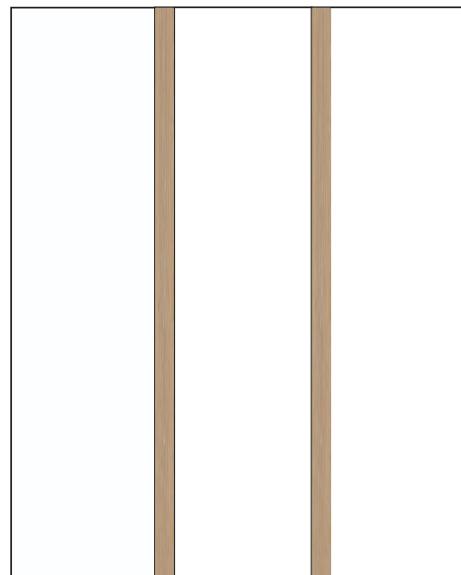

Very clean design,
with the same material
and door finishings.
The Touch/Soft opening system
is set on the back of the door
and completely
hidden within the wood
thickness (min. 22 mm).

Touch/Soft ensures perfect
alignment between the handle
front surface and the door.

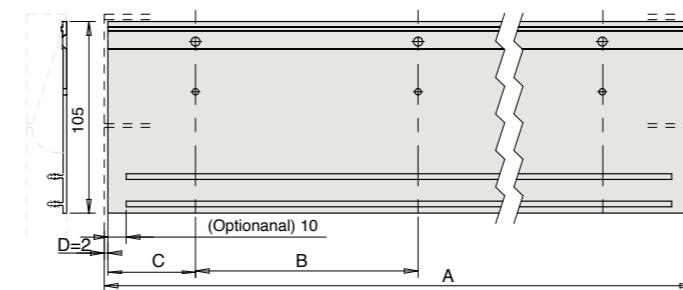

With its simple design,
Touch/Soft is the perfect
combination of functionality
and refined aesthetics.
The first opening system
that preserves the architectural
simplicity of the cabinet
and that does not need
accessories.

note
Il prodotto consente di riservare l'accesso ad un vano tramite la chiusura di una serratura azionata da un dispositivo a comando elettronico. L'ordine di apertura, infatti, viene inviato tramite la digitazione sulla tastiera di un codice segreto impostabile. In caso di esaurimento della pila interna, l'apertura dell'anta è comunque consentita dalla possibilità di appoggiare sugli appositi spazi della tastiera stessa una pila carica.

notes
This product permits
the opening of a furniture door
by means of an electronically
activated lock.
The instruction to open is given
by dialling a secret code.
If the internal battery dies,
the door is opened
by holding a new battery
to the two poles on the front
of the lock, and dialling
the code as normal.

ACCESSORI PER ARMADI

WARDROBE ACCESSORIES

Flow System

design: Egidio Panzera

Flow è il nuovo sistema di accessori per gli armadi e cabine armadio per la casa e per il contract. L'idea di progetto parte dalla volontà di immaginare con un'unica estetica coordinata ed armoniosa, tutti i molteplici accessori presenti nell'armadio contemporaneo.

Il sistema germina dall'elemento base quale il porta gruccie estraibile, costituito da due profili rettangolari e un terminale maniglia; da chiuso, un sottile taglio orizzontale accoglie gli uncini delle gruccie, generando, in tal modo, un'estetica elegante e minimale.

Il terminale maniglia è il dettaglio riconoscibile del sistema, si ripete in ogni configurazione, è l'elemento personalizzabile con il logo del mobilier o del brand dell'hospitality, funge da maniglia ma anche da anello porta gruccia, inoltre svincolato dai profili dell'elemento base e montato in coppia sulle spalle, diviene porta tubo trasversale.

L'elemento base può essere arricchito di nuovi componenti per divenire, usato singolarmente sulla spalla, un porta cravatte-cinture, o altrimenti in coppia un cassetto o un porta pantaloni. Flow è prodotto nelle tonalità del bronzo, argento e nichel, ma è anche possibile rivestirlo con carta decoro legno coordinata agli interni dell'armadio.

MA01201

portagrucce scorrevole - sliding hanging rail

design: Egidio Panzera

168 Flow is the new accessories system for closets and walk-in closets for the home and contract.

The project idea starts from the desire to imagine, with a single coordinated and harmonious aesthetics, all the many accessories in the contemporary cabinet.

The system germinates from the base element: the sliding hanging rail, consisting in two rectangular profiles and a terminal handle; when closed, a thin horizontal cut welcomes the hooks of the hangers, creating, thus, an elegant and minimal aesthetics.

The terminal handle is the recognizable detail of the system. It is repeated in each configuration, and it is customizable with the furniture producer logo or the hospitality brand.

It serves as a handle as well as a hanger support ring; additionally, without the base element profiles and mounted in pairs on the shoulders, it becomes a tube support.

The basic element can be enriched with new components for becoming, when used individually on the shoulder, a ties-belts rack, or, when used in pairs, a drawer or a trousers rack.

Flow is produced in shades of bronze, silver and nickel.

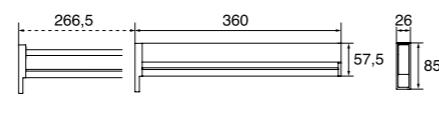

It will be possible to cover it with wood paper decoration coordinated to the cabinet interior.

materiale
alluminio
metallo presso fuso
nylon
bussole in Teflon

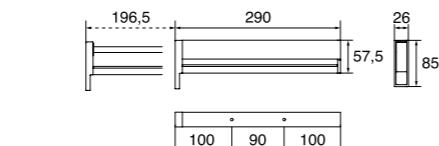

finiture
argento 7
bronzo
nickel velour

Elemento scorrevole porta gruccie caratterizzato da un disegno geometrico. È compatto e rispetta la pulizia del mobile nel quale viene inserito. Una volta estratto accoglie comodamente le gruccie che si appoggiano su una guarnizione che protegge la parte metallica dai ganci e mantiene più ferme le gruccie durante lo scorrimento. Lo scorrimento è fluido, grazie alla combinazione del tubo in alluminio anodizzato e di bussole in Teflon. L'elemento di copertura può essere personalizzato (es: con il logo del produttore o con il nome dell'hotel).

MA01201/A0

MA01201/B0

MA01202

portacinture/cravatte scorrevole - sliding ties/belts rack

design: Egidio Panzera

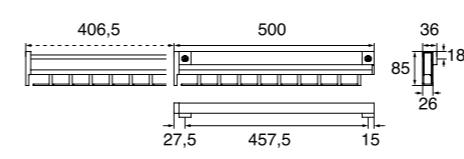

materiale
alluminio
metallo presso fuso
nylon
bussole in Teflon

finiture
argento 7
bronzo
nickel velour

Elemento scorrevole porta cinture e cravatte. I ganci si possono sollevare per far entrare comodamente le cravatte e le fibbie delle cinture. L'elemento si applica sulla spalla destra facilmente grazie ad elementi di aggancio in plastica al quale si fissa con un grano. Nel caso fosse necessario distanziare maggiormente lo scorrevole dalla spalla del mobile è possibile utilizzare più elementi di aggancio.

kit per tubo - kit for tube

design: Egidio Panzera

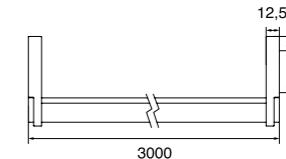

materiale
alluminio
metallo presso fuso
nylon
bussole in Teflon

finiture
argento 7
bronzo
nickel velour

Il tubo del sistema è nella stessa finitura del supporto ed è caratterizzato da una sezione quadrata sulla quale viene applicata una guarnizione per la protezione del tubo e per mantenere più ferme le gruccie. Il tubo è disponibile in verghe da mm 3000, che il cliente può tagliare a misura; un tappo viene inserito nel tubo in modo da consentire il perfetto accoppiamento con il supporto che nasconde il taglio realizzato. La guarnizione è venduta separatamente.

MA01210/A0

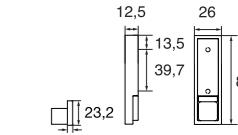

material
aluminum
die-cast metal
nylon
Teflon bushes

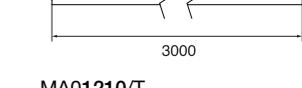

finishings
silver 7
bronze
nickel velour

The tube of the system is in the same finish of the support and is characterized by a square section on which is applied a gasket strip for the protection of the tube and to maintain steadier crutches. The tube is available in 3000 mm length, the customer can cut by measure; a plug is inserted into the tube so as to allow perfect matching with the support that hides the cut made. The gasket strip is sold separately.

cassetto - drawer

design: Egidio Panzera

170

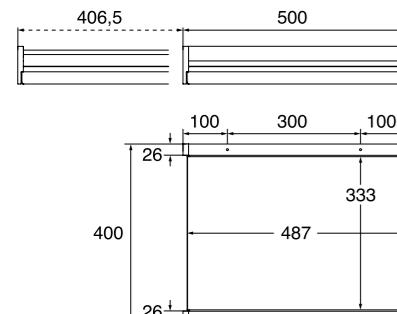

materiale
alluminio
metallo presso fuso
nylon
bussole in Teflon
acciaio

finiture
argento 7
bronzo
nickel velour

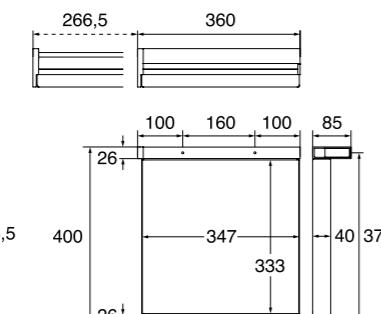

Cassetti di servizio, con profondità minima, complementari ad eventuali cassetti realizzati in legno e con la caratteristica di potersi fissare molto facilmente sotto la mensola. Questo consente di non doversi necessariamente adattare alla larghezza dell'armadio: flessibilità d'uso e quindi di vendita, combinati con una facilità di installazione.

E' possibile (previa richiesta) fissare il cassetto sotto una mensola in vetro (lasciando intravedere il contenuto).

portagrucce scorrevole - sliding hanging rail

Design: PAOLO NAVA

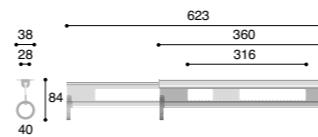

materiale
alluminio
impugnatura e guarnizioni
in polipropilene
movimento con parti
in nylon

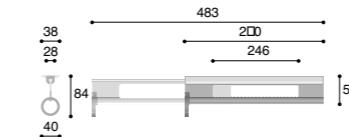

finiture
argento 7

Elemento scorrevole che consente di alloggiare le grucce anche in armadi poco profondi. Anche con un peso notevole, il meccanismo interno del prodotto consente la massima facilità di scorrimento. Il particolare design contraddistingue questo prodotto dai prodotti presenti oggi sul mercato, in quanto tutto in alluminio, dal disegno molto moderno, grazie anche all'inserto che funge da impugnatura che garantisce un'ottima presa. La zigrinatura sullo scorrevole impedisce alle grucce ospitate di schiacciarsi tra loro rovinando gli abiti sostenuti.

Esempi di applicazione delle finiture innovative

Le finiture innovative di Confalonieri sono il risultato di una approfondita analisi di mercato e delle tendenze in atto nel mondo dell'arredamento, con riferimento ai colori e alle essenze più diffuse.

E' possibile utilizzare il prodotto Confalonieri tono su tono rispetto al supporto sul quale è applicato (per una presenza più discreta), oppure in contrasto, con una maggiore visibilità, pur mantenendo coerenza con l'insieme.

antracite satinata – satin anthracite

Application examples of innovative finishing

The Confalonieri innovative finishes are the result of an in-depth market analysis and trends in the furniture world, with reference to the most common colors and veneers.

It is possible to use the Confalonieri products with a similar color approach with respect to the support on which it is applied (for a more discreet presence), or in contrast, with greater visibility, while maintaining consistency with the whole.

The accessories and complements of Confalonieri find their

application on furniture and more generally in the furnishing and become important details able to "dialogue" with the context in which they are inserted, adding value to the whole.
